The Others How Animals Made Us Human:

What are the Animals to Us? David Aftandilian, 2007 In What Are the Animals to Us scholars from a wide variety of academic disciplines explore the diverse meanings of animals in science religion folklore literature and art **The Others** Paul Shepard, 1996 Paul Shepard has been one of the most brilliant and original thinkers in the field of human evolution and ecology for more than forty years His thought provoking ideas on the role of animals in human thought dreams personal identity and other psychological and religious contexts have been presented in a series of seminal writings including Thinking Animals The Tender Carnivore and the Sacred Game and now The Others his most eloquent book to date The Others is a fascinating and wide ranging examination of how diverse cultures have thought about reacted to and interacted with animals Shepard argues that humans evolved watching other animal species participating in their world suffering them as parasites wearing their feathers and skins and making tools of their bones and antlers For millennia we have communicated their significance by dancing sculpting performing imaging narrating and thinking them The human species cannot be fully itself without these others Shepard considers animals as others in a world where otherness of all kinds is in danger and in which otherness is essential to the discovery of the true self We must understand what to make of our encounters with animals because as we prosper they vanish and ultimately our prosperity may amount to nothing without them **How Compassion Made Us Human** Penelope Spikins, 2015-05-07 An intriguing look at how our capacity to care about and connect with others has contributed to our evolutionary success as a species Our ability to care about the wellbeing of others whether they are close family or strangers can appear to be unimportant in today's competitive societies But in this volume archaeologist Penny Spikins argues that compassion lies at the heart of what makes us human She takes us on a journey from the earliest Stone Age societies two million years ago to the lives of Neanderthals in Ice Age Europe using archaeological evidence to illustrate the central role that emotional connections had in human evolution Simple acts of kindness left to us from millions of years ago provide evidence for how social emotions and morality evolved and how our capacity to reach out beyond ourselves into the lives of others allowed us to work together for a common good and form the basis for human success *Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History* Dominik Ohrem, 2025-11-18 Volume IV comprises two sections dealing respectively with the development of pet culture and its evolution as a cultural institution over the course of the long nineteenth century and with the variegated presence of domesticated and feralised animals in U S cities Closely tied to the antebellum rise of the American middle class family and the sentimentalisation of certain human animal relationships by the turn of the twentieth century American petkeeping had become the target of an expansive industry that offered everything from gourmet pet foods and fashionable accessories to healthcare and boarding services This proliferation of companion animals also had a significant impact on urban life Besides walking sitting or lying on sidewalks and being sold in city stores and on street corners in cases of abandonment the animals

swelled an ever increasing population of canine and feline strays Together with horses pigs cows chicken and urban wildlife these animals fundamentally shaped the routines rhythms and general experience of nineteenth century urban life for human city dwellers Sustainable Futures for Climate Adaptation Benedict Anderson,2023-12-11 Considering sustainability as a flawed and restrictive term in practice Sustainable Futures for Climate Adaptation argues that we must radically adapt humanity and reform society cities buildings and our approach to migration in order to coexist in harmony with our natural environments The book conceives an Earth human coexistence where the world s regions are shared globally between all people in contrast to a reality where we have lost touch with the natural world It is this decoupling of humanity and nature that has brought us to the brink of climate disaster In response Benedict Anderson explores the concept of wearing our ecology where human mobility is synchronized with the environment merging people with landscapes topographies and geographies Anderson argues that we need to create new migration routes for people moving between the Global South and North and establish flexible and adaptive living environments Only by rethinking separations between urban and rural resource extraction and consumption racial prejudice and accessibility are we able to forge a closer partnership with nature to adapt to climate change and mitigate the worst of its effects Touching on themes of adaptive urban design racial and gender segregation and inequality and climate apocalypticism this book will be valuable reading for researchers scholars and upper level students in the fields of urban studies migration studies human geography ecology politics and design

Dominion of Bears Sherry Simpson,2013-10-18 Long ago we invited bears into our stories our dreams our nightmares our lives We have always sought them out where they live for their hides their meat their beauty their knowingness Human country and bear country exist side by side As Sherry Simpson suggests the relationship between bears and humans is ancient and ongoing and in Alaska profoundly and often uncomfortably close A huge number of North America s bears live in Alaska including at least 31 000 brown bears 100 000 black bears and 3 500 polar bears And nearly every aspect of Alaskan society reflects their presence from hunting to tourism marketing to wildlife management to urban planning A long time Alaskan Simpson offers a series of compelling essays on Alaskan bears in both wild and urban spaces because in Alaska bears are found not only in their natural habitat but also in cities and towns Combining field research interviews and a host of up to date scientific sources her finely polished prose conveys a wealth of information and insight on ursine biology behavior feeding mating social structure and much more Simpson crisscrosses the Alaskan landscape in pursuit of bears as she muses marvels and often stands in sheer awe before these charismatic creatures Firmly grounded in the expertise of wildlife biologists hunters and viewing guides she shows bears as they actually are not as we imagine them to be She considers not only the occasionally aggressive behavior bears need to survive but also the violence exacted upon them by trophy hunters advocates of predator control or suburbanites who view bears as land sharks that threaten the safety of their families Shifting effortlessly between fascinating facts and poetic imagery Simpson crafts an extended meditation on why we are so

drawn to bears and why they continue to engage our imaginations populate indigenous mythologies and help define our essential visions of wilderness As Simpson observes The slightest evidence that bears share your world or that you share theirs can alter not only your sense of the landscape but your sense of yourself within that landscape Animal Lives and Why They Matter Arne Johan Vetlesen,2022-10-25 This book engages with the changing ways in which we as a society and culture look upon and interact with animals stressing how much animals differ among themselves An invitation to appreciate the peculiar role of animals in telling important if uncomfortable truths about who we are and where we are heading namely towards a world so much poorer in cultural moral and biological diversity as a result of the ongoing decimation of so many other species Drawing on a variety of thought ranging from that of Midgley Plumwood and Murdoch to Levinas Derrida and Habermas from ecophilosophers to conservation biologists Animal Lives and Why They Matter asks how we have come to this and what an alternative less destructive approach to our now precarious coexistence with animals might look like Spanning the disciplines of philosophy psychology and anthropology this enquiry into various cross species relationships and encounters will appeal to scholars and students across the humanities and social sciences with interests in philosophy ethics human animal interaction and environmental thought **With Respect for Nature** J. Claude Evans,2012-02-01 We eat inevitably at the expense of other living creatures How can we take the lives of plants and animals while maintaining a proper respect for both ecosystems and the individuals who live in them including ourselves In this book philosopher J Claude Evans challenges much of the accepted wisdom in environmental ethics and argues that human participation in the natural cycles of life and death can have positive moral value With a guide for the nonphilosophical reader and set against the background of careful and penetrating critiques of Albert Schweitzer s principle of reverence for life and Paul Taylor s philosophy of respect for nature Evans uses hunting and catch and release fishing as test cases in calling for a robust sense of membership in the natural world The result is an approachable existential philosophy that emphasizes the positive value of human involvement in natural processes in which life and death giving and receiving self and other are intertwined

Compassion Werner J. Krieglstein,2021-12-06 This book makes compassionate caring and connectedness the central themes Imbedded in the human psyche we find a deep yearning for connection This book explores the many roadblocks that human beings put in the way of a healthy and respectful dialogue with each other with nature and with the universe It also cites numerous examples from literature philosophy and society of a reawakening sense of connectedness **Secret**

Sharers: Melville, Conrad and Narratives of the Real Paweł Jędrzejko,Milton M. Reigelman,Zuzanna Szatanik,2011-01-01 The present book explores a variety of fundamental questions that all of us secretly share Its twenty one chapters written by some of the world s leading Melville and Conrad scholars indicate possible directions of comparativist insight into the continuity and transformations of western existentialist thought between the 19th and 20th centuries The existential philosophy of participation so mistrustful of analytical categories is epitomized by the lives and oeuvres of Melville

and Conrad Born in the immediacy of experience this philosophy finds its expression in uncertain tropes and faith based actions rather than muffle the horror vacui with words it plunges head first into liminality where logos dissolves into a positive nothing Unlike analytical philosophers both Melville and Conrad refrain from talking about reality they expose those who would listen to a first hand experience of participation in an interpretive act Employing literary tropes to denude the essence of the human condition they allow their readers to transgress the limitations of language Mistrustful of language they accept the necessity of discourse which to make sense must be actively reshaped endlessly questioned and constantly revised And if uncertainty is the only certainty available to us our lowly human condition also necessitates compassion an existential cure against the liquid capricious reality we are afforded
