Dura-Europos Lucinda Dirven,2015-08-27 This volume deals with the religion of Palmyrenes in Dura Europos during the first three centuries of the Common Era and focuses upon the religious interaction between this migrant community and their new residence By studying the religious interaction of distinct groups on a local level this study aims to contribute to a better understanding of the process of religious development and change in Syria during the Roman period Information on the Palmyrenes of Dura Europos consists primarily of archaeological remains that have been found there The Palmyrene materials from Dura Europos have never been published collectively and for this reason they are enumerated and re evaluated in the appendix The book is richly illustrated with 20 figures and 22 plates **The Installation of Baal's High**

Priestess at Emar: A Window on Ancient Syrian Religion Daniel E. Fleming,2018-08-14 *Islam* Jacques Waardenburg,2008-08-22 This book presents some twenty essays on different aspects of Islam in history and the present These essays are grouped into eight larger sections The first The Beginnings deals with the transition from pre Islamic understandings and reason an essential part of the Quranic message The next two sections deal with Islam specifically as a religion with its particular signs and symbols The question of rules of interpretation in Islam and its structural features is discussed here Sections four and five deal with ethics in Islam including Muslim identity and human rights and certain social functions of Islam Section six introduces some 19th and 20th century reform movements with special attention given to developments in Saudi Arabia and the puritan characteristics of present day Islamic revival movements The final two sections discuss contemporary issues Islamization processes and policies Islamic ideologies the ideologization of Islam and the political uses of religion Throughout the book the author shows the links between the religious and other interpretations and uses made of Islam and the contexts in which they are made The Introduction signals some important developments in Islamic studies since World War II **The City of the Moon God** Tamara M. Green,2015-09-01 This study treats the religious and intellectual history of the city of Harran Eastern Turkey from biblical times down to the establishment of Islam The author starts from the well known reference in the Qur an and the early Islamic histories to the people of Harran as Sabians one of the peoples of the book The author unravels strands of religious tradition in Harran that run from the old Semitic planetary cults through Hellenistic hermeticism gnosticism and Neo Pythagoreanism and Christian cults to esoteric Islamic sects such as the Sufis and Shiites **Temples and Sanctuaries in the Roman East** Arthur Segal,2013-10-31 This

lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and sanctuaries built in the

Roman East between the end of the 1st century BCE and the end of the 3rd century CE within a broad region encompassing the modern states of Syria Lebanon Israel and Jordan Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axuality frontality and symmetry of the temple as viewed from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion
