Darwinian Evolution and Classical Liberalism Stephen C. Dilley, 2013-05-02 Darwinian Evolution and Classical Liberalism canvasses an array of thinkers from the past to the present as it examines fundamental political philosophical ethical economic anthropological and scientific aspects of the ferment between Darwinian biology and classical liberalism Early chapters focus on classical thinkers like John Locke and Adam Smith while later chapters provide analyses of present day classical liberals focusing especially on F A Hayek Thomas Sowell and Larry Arnhart the most prominent advocates of contemporary classical liberalism Thematically the volume falls into three parts Part I examines foundational matters arguing that Darwinism and classical liberalism hold incompatible visions of morality human nature and individual autonomy This section also contends that the free market s spontaneous order is fully compatible with a teleological or non Darwinian view of the universe Part II turns to contemporary applications contending that Darwinism and classical liberalism are at odds in their views of or implications about limited government vital religion economic freedom and the traditional family This section also argues that since its inception Darwinism has attenuated core tenets and values of classical liberalism and Western civilization Part III of the volume contains alternative views to those in the first two parts adding critical diversity to the book Respectively these chapters hold that Darwinian evolution simply has little to say about classical liberalism an evolutionary account of human volition is fully compatible with the individual choice presupposed in classical liberalism and evolutionary naturalism unlike religious alternatives provides a strong foundation for freedom morality and the traditional family
