The Pivot Of Civilization In Gods Own Image:

The Pivot of Civilization in Historical Perspective Margaret Sanger, 2003-09 Today's heated debates over social issues such as abortion birth control ethnicity immigration race religion sexual behavior and welfare did not begin in the 1960s. They began in the last years of the nineteenth century and reached their zenith in the 1920s when this book sold over 200 000 copies. Here is all the text of Margaret Sanger's 1922 best seller along with 31 chapters by her contemporaries to set what she advocated in historical perspective. This is not history told after the fire and passion have died out. These are words spoken in the heat of battle at a time when Sanger and others believed that the fate of civilization depended on their ideas winning acceptance here and around the world.

The Jewish Political Tradition Michael Walzer, Menachem Lorberbaum, Noam Zohar, Yair Lorberbaum, 2000-01-01 This book launches a landmark four volume collaborative work exploring the political thought of the Jewish people from biblical times to the present. Each volume includes a selection of texts from the Bible and Talmud midrashic literature legal responsa treatises and pamphlets annotated for modern readers and accompanied by new commentaries written by eminent philosophers lawyers political theorists and other scholars working in different fields of Jewish studies. These contributors join the arguments of the texts agreeing or disagreeing elaborating refining qualifying and sometimes repudiating the political views of the original authors. The series brings the little known and unexplored Jewish tradition of political thinking and writing into the light showing where and how it resonates in the state of Israel the chief diaspora settlements and more broadly modern political experience. This first volume Authority addresses the basic question of who ought to rule the community. What claims to rule have been put forward from the time of the exodus from Egypt to the establishment of the state of Israel. How are such claims disputed and defended. What constitutes legitimate authority. The authors discuss the authority of God then the claims of kings priests prophets rabbis lay leaders gentile rulers during the years of the exile and the Israeli state. The volume concludes with several perspectives on the issue of whether a modern state can be both Jewish and democratic. Forthcoming volumes will address the themes of membership community and political vision. Among the contributors to this volume Amy Gutmann Moshe Halbertal David Hartman Moshe Idel Sanford Levinson Susan Neiman Hilary Putnam Joseph Raz Michael Sandel Allan Silver Yael Tamir.

Teaching of Yoga S.r.tiwari, Folk Art and Modern Culture in Republican China Felicity Lufkin, 2016-01-21 Folk art is now widely recognized as an integral part of the modern Chinese cultural heritage but in the early twentieth century awareness of folk art as a distinct category in the visual arts was new. Internationally intellectuals in different countries used folk arts to affirm national identity and cultural continuity in the midst of the changes of the modern era. In China artists critics and educators likewise saw folk art as a potentially valuable resource perhaps it could be a fresh source of cultural inspiration and energy representing the authentic voice of the people in contrast to what could be seen as the limited and elitist classical tradition. At the same time many Chinese intellectuals also saw folk art as a problem they

believed that folk art as it was promoted superstitious and backward ideas that were incompatible with modernization and progress In either case folk art was too important to be left in the hands of the folk educated artists and researchers felt a responsibility intervene to reform folk art and create new popular art forms that would better serve the needs of the modern nation In the early 1930s folk art began to figure in the debates on social role of art and artists that were waged in the pages of the Chinese press the first major exhibition of folk art was held in Hangzhou and the new print movement claimed the print as a popular artistic medium while for the most part declaring its distance from contemporary folk printmaking practices During the war against Japan from 1937 to 1945 educated artists deployed imagery and styles drawn from folk art in morale boosting propaganda images but worried that this work fell short of true artistic accomplishment and pandering to outmoded tastes The questions raised in interaction with folk art during this pivotal period questions about heritage about the social position of art and the exercise of cultural authority continue to resonate into the present day

Gods and Men in Egypt Françoise Dunand, Christiane Zivie-Coche, 2004 In their wide ranging interpretation of the religion of ancient Egypt Fran oise Dunand and Christiane Zivie Coche explore how over a period of roughly 3500 years the Egyptians conceptualized their relations with the gods Drawing on the insights of anthropology the authors discuss such topics as the identities images and functions of the gods rituals and liturgies personal forms of piety expressing humanity s need to establish a direct relation with the divine and the afterlife a central feature of Egyptian religion That religion the authors assert was characterized by the remarkable continuity of its ritual practices and the ideas of which they were an expression Throughout Dunand and Zivie Coche take advantage of the most recent archaeological discoveries and scholarship Gods and Men in Egypt is unique in its coverage of Egyptian religious expression in the Ptolemaic and Roman periods Written with nonspecialist readers in mind it is largely concerned with the continuation of Egypt s traditional religion in these periods but it also includes fascinating accounts of Judaism in Egypt and the appearance and spread of Christianity there

Biblical Text and Exegetical Culture Michael Fishbane, 2022-01-25 In this wide ranging collection Michael Fishbane investigates the complex and diverse relationships between the biblical text and exegetical culture The author demonstrates the multiple literary dimensions and interpretative strategies that came to form the Hebrew Bible in the context of the ancient Near East the Dead Sea Scrolls in the context of an emergent biblical Jewish culture and the classical rabbinic Midrash in the context of an emergent rabbinic civilization in late antiquity Within each study and in the collection as a whole the author shows a broad range of creative methods always with a scholarly concern to illuminate the religious ideas of Scripture as it was perceived through diverse hermeneutical lenses and exegetical methodologies The studies range from the purely literary to the highly analytic from myth to law and from studies of symbols to the study of exegetical methods

Formulations Andrew Witt, 2022-01-11 An investigation of mathematics as it was drawn encoded imagined and

interpreted by architects on the eve of digitization in the mid twentieth century In *Formulations* Andrew Witt examines the visual methodological and cultural intersections between architecture and mathematics The linkages Witt explores involve not the mystic transcendence of numbers invoked throughout architectural history but rather architecture's encounters with a range of calculational systems techniques that architects inventively retooled for design Witt offers a catalog of mid twentieth century practices of mathematical drawing and calculation in design that preceded and anticipated digitization as well as an account of the formal compendia that became a cultural currency shared between modern mathematicians and modern architects Witt presents a series of extensively illustrated biographies of method episodes that chart the myriad ways in which mathematics particularly the mathematical notion of modeling and drawing was spliced into the creative practice of design These include early drawing machines that mechanized curvature the incorporation of geometric maquettes theorems made flesh into the toolbox of design the virtualization of buildings and landscapes through surveyed triangulation and photogrammetry formal and functional topology stereoscopic drawing the economic implications of cubic matrices and a strange synthesis of the technological mineral and biological crystallographic design Trained in both architecture and mathematics Witt uses mathematics as a lens through which to understand the relationship between architecture and a much broader set of sciences and visual techniques Through an intercultural exchange with other disciplines he argues architecture adapted not only the shapes and surfaces of mathematics but also its values and epistemic ideals
