Slice Seventies First Trilogy:

The Science of Magic Trilogy Brian Neptune, 2014-05-30 This is a fast paced DND book About the mages of the world A mage is anyone who uses magic Wizards witches alchemist sorcerers and sorceress are all examples of a mage The science of magic is based on the philosophy that all technology and science is magic until it is understood Quantum physics is an attempt to understand a deeper magic Rubbing two sticks together to start a fire was magic in the beginning But to use magic you don't have to understand all the underlying physics You simply have to believe and know the process Someday maybe science will understand astral projection telepathy telekinesis and other mental magical feats If so it will probably be quantum physics that makes the breakthrough You don't have to look far in the modern world to see magic Look at your cell phone your computer your high definition television or even a simple light bulb All these things are in a sense the science of magic Where magic has become commonplace You see and use it everyday There was a time only wizards had such power available to them At times throughout history you would have been put to death for displaying such power For if government could not control the power they were threatened by the power Thus Mageville was created by society to isolate and control the uncontrollable magic Until a time when the government could harness the power for its use Thus through a joint effort by wizards and government we have harnessed lasers flight radio waves and all the other modern conveniences we take for granted But most of the governments of the world have a city like Mageville And the war of magic and technology rages on world wide The common mortal mankind oblivious to the war But a great cycle of civilization is underway Unstoppable in its momentum The world will learn the price of magic The world is about to have a DND experience **The Persephane**
