Serviceology for Smart Service System Yuriko Sawatani, James Spohrer, Stephen Kwan, Takeshi Takenaka, 2016-10-05

Services are key activities in a globalized economy and they also underlie the quality of life of local residents. The advanced work presented in this book was selected from the proceedings of the Third International Conference on Serviceology ICServ2015 held July 7-9, 2015 in San Jose, CA, USA. The conference was supported by the Society for Serviceology. The society was established in 2012 in Japan to explore the scientific systematization of services and to promote technological developments for solutions to industrial issues. This book provides a useful general guide to the state of the art in the theory and practice of services. It can also serve as a valuable reference book for researchers in a wide range of fields from engineering to marketing and economics.

Smart Service Management Maria Maleshkova, Niklas Kühl, Philipp Jussen, 2021-01-26. This book presents the main theoretical foundations behind smart services as well as specific guidelines and practically proven methods on how to design them. Furthermore, it gives an overview of the possible implementation architectures and shows how the designed smart services can be realized with specific technologies. Finally, it provides four specific use cases that show how smart services have been realized in practice and what impact they have within the businesses. The first part of the book defines the basic concepts and aims to establish a shared understanding of terms such as smart services, service systems, smart service systems, or cyber physical systems. On this basis, it provides an analysis of existing work and includes insights on how an organization incorporating smart services could enhance and adjust their management and business processes. The second part on the design of smart services elaborates on what constitutes a successful smart service and describes experiences in the area of interdisciplinary teams, strategic partnerships, the overall service systems, and the common data basis. In the third part, technical reference architectures are presented in detail, encompassing topics on the design of digital twins in cyber physical systems, the communication between entities and sensors in the age of Industry 4.0, as well as data management and integration. The fourth part then highlights a number of analytical possibilities that can be realized and that can constitute or be part of smart services, including machine learning and artificial intelligence methods. Finally, the applicability of the introduced design and development method is demonstrated by considering specific real-world use cases. These include services in the industrial and mobility sector which were developed in direct cooperation with industry partners. The main target audience of this book is industry-focused readers, especially practitioners from industry who are involved in supporting and managing digital business. These include professionals working in business development, product management, strategy, and development, ranging from middle management to Chief Digital Officers. It conveys all the basics needed for developing smart services and successfully placing them on the market by explaining technical aspects as well as showcasing practical use cases.

Digitalization and Asia-Pacific Business Models Tachia Chin,Chris Rowley,Shouyang Wang,2023-02-21 Owing to the convergence of multiple cultures coupled with the unprecedented rapid development in the decades since the late 1990s the value creation and innovation logic of Asia Pacific business models BMs has been constantly altered by cultural heterogeneity As a result a more complex and diverse landscape relative to Western developed economy BMs evolved Moreover the digitalization has fundamentally changed the way people do business which has promoted a new wave of BM evolution Unlike a typical linear mode of innovation driven by market demands in many Western cultures a large number of entrepreneurial enterprises from the Asia Pacific with eastern religions and philosophies have tended to adopt unconventional culturally grounded strategies of value creation and innovation in their BMs However it is difficult to find a Western equivalent to the value creating route that embodies the humanitarian spirit of Confucianism accommodating

simultaneously social and economic values to accelerate innovation during internationalization in existing literatures This book offers a more holistic picture and contemporary interpretation for identifying and characterizing the unorthodox innovation patterns and the perplexing value creating logic of Asia Pacific BMs at the crossroads of diverse cultures It was originally published as a special issue of the Asia Pacific Business Review This book is supported by the National Natural Science Foundation of China No 72272136 71988101
