Modelling and Analysis of Sustainability Related Issues in New Era Wen-Hsien Tsai, 2019-06-24. The purpose of this Special Issue is to investigate topics related to sustainability issues in the new era, especially in Industry 4.0 or other new manufacturing environments. Under Industry 4.0, there have been great changes with respect to production processes, production planning, and control quality assurance, internal control, cost determination, and other management issues. Moreover, it is expected that Industry 4.0 can create positive sustainability impacts along the whole value chain. There are three pillars of sustainability, including environmental sustainability, economic sustainability, and social sustainability. This Special Issue collects 15 sustainability-related papers from various industries that use various methods or models, such as mathematical programming, activity-based costing, ABC, material flow cost accounting, fuel consumption model, artificial intelligence (AI)-based fusion model, multi-attribute decision model, MADM, and so on. These papers are related to carbon emissions, carbon tax, Industry 4.0, economic sustainability, corporate social responsibility (CSR), etc. The research objects come from China, Taiwan, Thailand, Oman, Cyprus, Germany, Austria, and Portugal. Although the research presented in this Special Issue is not exhaustive, this Special Issue provides abundant significant research related to environmental, economic, and social sustainability. Nevertheless, there still are many research topics that require our attention to solve problems of sustainability.

Sustainable Supply Chains and Digital Transformation Saurabh Tiwari, Richa Goel, 2025-08-11. This book focuses on the impact of digitalization on supply chains and how it is affecting every aspect of people's lives. It covers the operational changes that are happening in organizations due to the use of technologies such as IoT, cloud computing, smart sensors, electric vehicles, blockchain, AI, drones, smart factories, smart logistics, and smart warehouses. Additionally, it explores how digitalization is helping organizations achieve sustainability through methods like life cycle costing, carbon emission reduction, green supply chains, and recycling technologies. *Sustainable Supply Chains and Digital Transformation* includes case studies and exploratory studies utilizing quantitative analysis, scientific and qualitative studies to demonstrate how innovation and technology in supply chains contribute to business sustainability in emerging economies and the global economy and discusses the impact of digitalization on supply chains from both operational and sustainability perspectives.
