Updated treatment of functional programming with extensive coverage of OCaml. New chapters devoted to type systems and composite types. Unified and updated treatment of polymorphism in all its forms. New examples featuring the ARM and x86 64 bit architectures. *e-HR* Bryan Hopkins, James Markham, 2018-02-05 Title first published in 2003. Despite all the hype about e-learning, the real breakthrough in technology at least as far as HR goes is in the development of the corporate intranet for people management purposes. Bryan Hopkins and James Markham's book explains the potential for intranets in every aspect of HR: personnel administration, performance management, employee development, communication and knowledge management, as well as training and e-learning. It asks and answers the key questions you need to ask yourself and provides case studies illustrating how organizations have successfully exploited their intranet to help their people work more effectively and efficiently. HR managers are under pressure to cut costs, increase the effectiveness and range of the services they deliver. In many organizations there is also considerable pressure to maximise the returns on investment in technology. This book provides you with the means to achieve all of these goals.
