The Cabinet Of Jan Svankmajer The Pendulum The Pit And Other Peculiarities:

Surrealism, Cinema, and the Search for a New Myth Kristoffer Noheden, 2017-06-28 This book examines post war surrealist cinema in relation to surrealism's change in direction towards myth and magic following World War II. Intermedial and interdisciplinary, the book unites cinema studies with art history and the study of Western esotericism, closely engaging with a wide range of primary sources including surrealist journals, art exhibitions and writings. Kristoffer Noheden looks to the Danish surrealist artist Wilhelm Freddie's forays into the experimental short film, the French poet Benjamin Péret's contribution to the documentary film *L'Invention du monde*, the Argentinean born filmmaker Nelly Kaplan's feature films and the Czech animator Jan Svankmajer's work in short and feature films. The book traces a continuous engagement with myth and magic throughout these films, uncovering a previously unknown strain of occult imagery in surrealist cinema. It broadens the scope of the study of not only surrealist cinema but of surrealism across the art forms. *Surrealism, Cinema, and the Search for a New Myth* will appeal to film scholars, art historians and those interested in the impact of occultism on modern culture, film and the arts.

Exiled From Our Bodies Tereza Stehlíková, 2025-09-30 In an era where digital devices increasingly mediate our perception of reality, this book explores the tension between the richness of direct sensory experience and the allure of the screen. It examines how our growing dependence on virtual spaces and visually dominant media has led to a disconnect from our bodies and environment, contributing to a sense of alienation, both personal and ecological. Drawing on an autoethnographic approach, artistic research methods and ethnographic interviews with experts across numerous disciplines, this book argues for the continuing importance of lived, embodied, multi-sensory experience. It considers how the arts, rather than merely reinforcing technological mediation, can actively subvert the passivity imposed on our subjectivity by the latter, offering creative strategies to re-engage with the world through all our senses. By using artistic processes to navigate the tension between the virtual and the real, the book explores how creative practices can generate new ways of seeing, feeling and understanding. At its core, this work suggests that to even begin to address the current environmental crisis, we must first return to our bodies and come back to our senses, literally and figuratively. Through artistic experimentation, philosophical inquiry and sensory exploration, it proposes a reawakening to the reciprocity between body, technology and environment, offering a pathway towards a more conscious, engaged and aesthetically ethical way of inhabiting the world.
