Humanitarian Response Index 2007 A. López-Claros, S. Hidalgo, 2015-12-26 The purpose of this annual report is to develop an index of good humanitarian donorship that will measure donors effectiveness against their commitment to the Principles and Good Practise of Humanitarian Donorship The index is intended to help the international donor community to better understand its strengths and weaknesses in order to improve the efficiency and quality of its donor activities and initiatives The index is also expected to raise awareness about the increasingly important role of humanitarian action and associated good practices beyond its current core constituencies We believe that this report offers significant potential to improve the quality of humanitarian aid benefiting those most affected by both man made and natural disasters

Humanitarianism in Question Michael Barnett, Thomas G. Weiss, 2012-05-15 Years of tremendous growth in response to complex emergencies have left a mark on the humanitarian sector Various matters that once seemed settled are now subjects of intense debate What is humanitarianism Is it limited to the provision of relief to victims of conflict or does it include broader objectives such as human rights democracy promotion development and peacebuilding For much of the last century the principles of humanitarianism were guided by neutrality impartiality and independence More recently some humanitarian organizations have begun to relax these tenets The recognition that humanitarian action can lead to negative consequences has forced humanitarian organizations to measure their effectiveness to reflect on their ethical positions and to consider not only the values that motivate their actions but also the consequences of those actions In the indispensable Humanitarianism in Question Michael Barnett and Thomas G Weiss bring together scholars from a variety of disciplines to address the

humanitarian identity crisis including humanitarianism's relationship to accountability great powers privatization and corporate philanthropy warlords and the ethical evaluations that inform life and death decision making during and after emergencies

Humanitarian Intervention T. Weiss, 2007-05-08 A singular development of the post Cold War era is the use of military force to protect human beings From Rwanda to Kosovo Sierra Leone to East Timor soldiers have rescued civilians in some of the world's most notorious war zones Drawing on two decades of research Thomas G Weiss provides a compelling introduction to the theory and practice of humanitarian intervention in the modern world He examines political ethical legal strategic economic and operational dimensions and uses a wide range of cases to highlight key debates and controversies This succinct and highly accessible survey is neither celebratory nor complacent The author locates the normative evolution of what is increasingly known as the responsibility to protect in the context of the war on terror and the 2005 UN World Summit The result is an engaging exploration of the current dilemmas and future challenges for international humanitarian action in the 21st Century

Humanitarian Business Thomas G. Weiss, 2013-04-24 With some 50 million people living under duress and threatened by wars and disasters in 2012 the demand for relief worldwide has reached unprecedented levels Humanitarianism is now a multi billion dollar enterprise and aid agencies are obliged to respond to a range of economic forces in order to stay in business In his customarily hard hitting analysis Thomas G Weiss offers penetrating insights into the complexities and challenges of the contemporary humanitarian marketplace In addition to changing political and military conditions that generate demand for aid private suppliers have changed too Today's political economy places aid agencies side by side with for profit businesses including private military and security companies in a marketplace that also is linked to global trade networks in illicit arms natural resources and drugs This witch's brew is simmering in the cauldron of wars that are often protracted and always costly to civilians who are the very targets of violence While belligerents put a price tag on access to victims aid agencies pursue branding in a competition for scarce resources relative to the staggering needs As marketization encroaches on traditional humanitarianism it seems everything may have a price from access and principles to moral authority and lives
