Markers of Psychosocial Maturation Mufid James Hannush, 2021-07-15 This book advances an integrative approach to understanding the phenomenon of psychosocial maturation Through a rigorous dialectically informed interpretation of psychoanalytic and humanistic existential phenomenological sources Mufid James Hannush distils thirty essential markers of maturity The dialectical approach is described as a process whereby lived

affect and value laden polar meanings are transformed through deep insight into complementary and integrative meta meanings The author demonstrates how responding to the call of maturation can be viewed as a life project that serves the ultimate purpose of living a balanced life The book will appeal to students and scholars of human development psychotherapy social work philosophy and existential humanistic and phenomenological psychology The 'Story-Takers' Paula M. Salvio, 2017-01-01 The Story Takers charts new territory in public pedagogy through an exploration of the multiple forms of communal protests against the mafia in Sicily Writing at the rich juncture of cultural feminist and psychoanalytic theories Paula M Salvio draws on visual and textual representations including shrines to those murdered by the mafia photographs and literary and cinematic narratives to explore how trauma and mourning inspire solidarity and a quest for justice among educators activists artists and journalists living and working in Italy Salvio reveals how the anti mafia movement is being brought out from behind the curtains with educators leading the charge She critically analyses six cases of communal acts of anti mafia solidarity and argues that transitional justice requires radical approaches to pedagogy that are best informed by journalists educators and activists working to remember not only victims of trauma but those who resist trauma and violence

Dancing an Embodied Sinthome Megan Sherritt, 2024-01-04 This book provides the first in depth analysis of Lacanian psychoanalytic theory and the art of dance and explores what each practice can offer the other It takes as its starting point Jacques Lacan s assertion that James Joyce s literary works helped him create what Lacan terms a sinthome thereby preventing psychosis That is Joyce s use of written language helped him maintain a normal existence despite showing tendencies towards psychosis Here it is proposed that writing was only the method through which Joyce worked but that the key element in his sinthome was play specifically the play of the Lacanian real The book moves on to consider how dance operates similarly to Joyce s writing and details the components of Joyce s sinthome not as a product that keeps him sane but as an interminable process for coping with the Lacanian real The author contends that Joyce goes beyond words and meaning using language s metre tone rhythm and cadence to play with the real mirroring his experience of it and confining it to his works creating order in the chaos of his mind The art of dance is shown to be a process that likewise allows one to play with the real However it is emphasized that dance goes further it also teaches someone how to play if one doesn t already know how This book offers a compelling analysis that sheds new light on the fields of psychoanalysis and dance and looks to what this can tell us about and the possibilities for both practices concluding that psychoanalysis and dance both offer processes that open possibilities that might otherwise seem impossible This original analysis will be of particular interest to those working in the fields of psychoanalysis aesthetics psychoanalytic theory critical theory art therapy and dance studies

Love Songs Perrine Moran, 2025-01-16 The dilemma of how to be emotionally dependent on another without losing oneself underlies many issues that couples bring to therapy and is the stuff of many love songs Its management results in different dynamics which the chapters of this book identify A psychoanalytic understanding of the connections between early

primary relationships and those formed in adulthood sheds light on the experiences of couples whether or not they enter therapy Written in an accessible and relatable style Perrine Moran brings psychoanalytic concepts to couple relationships through the medium of music In her clinical work as a couple therapist she often found herself thinking of a specific song that encapsulated something at the core of a couple At other times a song came to mind that captured a pattern repeated in a number of couples Intrigued Moran began to explore in depth the link between love songs and couples The result is a book that focuses on different types of couple dynamics such as disappointment enmeshment and difference and the songs and case vignettes that best illustrate them *Love Songs Listening to Couples* is ideal for practitioners and trainees working with couples and will appeal to a wide range of readers who enjoy popular music and are curious for personal academic or professional reasons about couple dynamics and problematic interactions *Brain and Mind* Andreas Steck, Barbara Steck, 2015-11-19 Recent advances in the understanding of brain functions are reviewed in this text along with how neurobiological research and brain imaging contributes to identifying and treating neurologic and psychiatric disorders Chapters focus on consciousness memory emotions language communication trauma pain and resilience while exploring how stressful events impact mental health and interrupt the continuity of one's sense of self Clinical vignettes of patients with neurological and mental affections reveal coping and grieving processes in dreams and narratives This presentation of clinical experience with neuro scientific evidence provides neurologists psychiatrists psychotherapists and psychologists with a coherent picture of the brain mind relationship **Teacher Education and the Political** Matthew Clarke, Anne Phelan, 2017-01-12 *Teacher Education and the Political* is a striking book which addresses the nature and purpose of teacher education in a global context characterised by economic and political anxieties around declining productivity and social inclusion These anxieties are manifested in recent policy developments such as the promotion of professional standards the deregulation and marketisation of teacher education and the imposition of performance related regimes that tie teachers pay to outcomes in high stakes testing The book assesses the implications of such policies for the work of teachers as well as for teacher educators and those undertaking initial teacher training It is argued that these policy moves can be read as a depoliticising and de intellectualising of teacher education In this context they illustrate how contemporary theory can provide a language for critiquing recent developments and imagining new trajectories for policy and practice in teacher education Drawing on the work of theorists from Derrida and Mouffe to Agamben and Lacan this book argues for the need to maintain a space for intellectual autonomy as a critical dimension of the ethico political work of teachers Together these ideas and analyses provide examples of the power of negative thinking illustrating its capacity to unsettle comfortable truths and foreground the political nature of teacher education Current teachers teacher educators and school leaders will be particularly interested readers alongside those concerned with policy in the wider educational landscape *Personal Process in Child-Centred Play Therapy* David Le Vay, Elise Cuschieri, 2022-09-02 *Personal Process in Child Centred Play*

Therapy provides a very specific exploration of the play therapy process from the personal perspective of the play therapist. This volume examines the personal challenges, opportunities, losses and gains and numerous obstacles that one has to negotiate through the course of both training to become a play therapist and working as a qualified clinician with children who have complex life difficulties. The book aims to offer a forum within which the role, function and process of the personal within play therapy can be explored. Bringing together a number of experienced play therapists, the book shares often deeply personal accounts of their experience of training and clinical practice. Chapters challenge the unspoken therapist taboos of shame, childhood trauma, vulnerability and grief, shining a light on the more hidden areas of therapist experience. Clinical issues around the unconscious process are also explored but once again from the personal position of the play therapist rather than the child. With a unique and distinct perspective on the therapeutic process, this book is specifically intended for both trainee and experienced play therapists but will be relevant to all psychotherapists involved in working therapeutically with children and young people.
