The Coast Of Southern Africa

TD Snyder

The Coast Of Southern Africa:

The Coast of Southern Africa John Kench, Ken Gerhardt, 1987 **Coastal Fishes of Southern Africa** Phillip C. Heemstra, Elaine Heemstra, 2004 A guide to over 400 species of the fishes along the coast of southern Africa this work features over 600 original paintings showing changes with growth and sexual differences in colour of many of the fishes The species accounts include descriptions and other information for identification and comparison of similar species **The Coastal Guide of South Africa** Lynne Matthews, 2007 On an extraordinary journey along South Africa's coastline this definitive guidebook explores the beauties and hidden secrets of the country's natural heritage Stretching for almost 2 000 miles the country's southern shoreline contains distinct climates that accommodate an enormously rich and diverse array of birds mammals reptiles marine life and plants The west coast plays host to cold nutrient rich waters kelp forests and low growing succulent scrub along the dunes while on the east and north coasts conditions are more tropical with higher rainfall warmer waters greater marine diversity and tall dense forests This handbook outlines the coastline's biodiversity from dune to ocean developed in order to offer beach enthusiasts vacationers and recreational anglers a simple way to identify the plants and animals most commonly seen or caught along the coast In addition to background information on tides and habitats guidelines are also included for The Southern African Sustainable Seafood Initiative a consumer guide to making sustainable choices Detailed and thorough this overview will create a deeper appreciation of what can be found on this rich and beautiful landscape **Estuarine Sedimentation Along the Natal Coast, South Africa** A. R. Orme, 1974 The character and materials of sedimentation in estuaries and lagoons along the 570 km Natal Coast are described and analyzed Sites examined include the Greater St Lucia lagoon system with its 9 major contributing rivers Richards Bay with its 2 main contributing rivers and 28 rivers that discharge directly into the Indian Ocean without passing through an intermediate lagoonal filtering system other than their own estuaries Discussion is based on field and remote sensing investigations and borehole data and is supported by pertinent maps and cross sections The nature and processes of sedimentation along the Natal coast are representative of events along more than 2000 km of African coast from central Mozambique to eastern Cape Province Modified author abstract **A Guide to, and Checklist for, the Decapoda of Namibia, South Africa and Mozambique (Volume 3)** W. D. Emmerson, 2017-06-20 Decapods are a culmination of nearly 600 million years of Crustacean evolution during which time they have radiated into a variety of superfamilies families genera and species which occupy a variety of niches from fresh mountain streams to the abysses of the oceans This book will fill a gap in the current literature on southern African decapods Since Barnard published his Descriptive Catalogue of South African Decapod Crustacea in 1950 there have been numerous additions and name changes This publication updates the taxonomy and includes ecological and fisheries information In addition Kensley's 1981 distributional checklist for the region has been updated and includes large numbers of new species and records for the region bringing the total number of decapod to over

1000 species Although not exhaustive 262 species are featured some of which are beautiful some have commercial or artisinal value both for consumption and the aquarium and some have important ecological functions while others are rare or interesting For each species there is a photograph synonymies common names a description ecological information and name derivation etymology All the decapod families found in South Africa are described some new along with chapters on decapod research history in southern Africa commercial and artisinal food value of decapods biodiversity and future research direction The book is arranged systematically as taxonomy is based on phylogeny starting with the earliest forms and progressing to the most derived and advanced forms and will serve to stimulate interest and future research into southern Africa s rich decapod biodiversity especially at a time when biodiversity itself is threatened by global warming coral bleaching and habitat loss It will appeal to people interested in Decapoda including academics scholars students fishermen aquarists aquaculturists recreational snorkel and SCUBA divers as well as those interested in conservation biodiversity management and governance
