

1. TRAINING

The most responsible and mature field staff of [name of implementing organisation] should be appointed to the positions of field supervisor. It is important that field supervisors attend the interviewer training as well as the specific supervisor training.

The active involvement of field supervisors in interviewer training is necessary for understanding the role of the interviewer and the problems that teams may encounter during fieldwork.

After completing the interviewer training, the final selection of field supervisors will be made. Following this but prior to the beginning of fieldwork, two or three days of additional training will be provided on the specific duties of field supervisors. This is to ensure that all teams will be following a uniform set of procedures.

2. RESPONSIBILITIES OF THE SUPERVISOR

The supervisor is the senior member of the field team. S/he is responsible for the well-being and safety of team members as well as the completion of the assigned workload and the maintenance of data quality. The supervisor receives his/her assignments from and reports to the [field coordinator or project director].

Although only men will be recruited as interviewers to administer the male questionnaire, women may be recruited as supervisors.

2.1 Role of supervisors

The following are expected of supervisors:

- a. Attending interviewer and supervisor training and pilot test.
- b. Preparing for field work daily, including packing for the team, lunch and the team's daily finances.
- c. Managing the team's budget during data collection.
- d. Allocating households and deploying staff for interviews.
- e. Driving/taking the team safely to the study area (where relevant).
- f. Identifying the correct areas for the interviews and selecting the target households as well as ensuring that fieldworkers identify the appropriate participants within a household.
- g. Managing PDA equipment – packing, unpacking, safekeeping, recharging and uploading data, troubleshooting (if your research project is using PDAs or similar technology to collect data).
- h. Managing staff in the field – safety, discipline, conduct and debriefing.
- i. Conducting quality control of interviews.
- j. Completing all the appropriate paper work connected to the project.
- k. Keeping regular contact with the field coordinator.
- l. Maintaining team morale.
- m. Handling all other meaningful requests.

Handbook on Knowledge Management 2 Clyde Holsapple, 2013-04-17 As the most comprehensive reference work dealing with knowledge management KM this work is essential for the library of every KM practitioner researcher and educator Written by an international array of KM luminaries its approx 60 chapters approach knowledge management from a wide variety of perspectives ranging from classic foundations to cutting edge thought informative to provocative theoretical to practical historical to futuristic human to technological and operational to strategic The chapters are conveniently organized into 8 major sections The second volume consists of the sections technologies for knowledge management outcomes of KM knowledge management in action and the KM horizon Novices and experts alike will refer to the authoritative and stimulating content again and again for years to come Dictionary of Acronyms and Technical Abbreviations Jakob Vlietstra, 2012-12-06 My first encounter with acronyms took place when I was ten years old and growing up in an occupied COWltry during the Second World War My father proudly announced one day that despite the ban imposed by the occupying administration he had managed to get a radio installed and could receive the BBC All acronyms used in this introduction are listed in this dictionary To me the meaning of BBC was that we would receive different information about the war than we got from the usual censored broadcasts There was of course the well known acronym associated with the NT but at that time I did not realize that it meant more than the postal service in those years a deteriorated service Gradually the daily use of acronyms grew Most of the newly acquired three and four letter abbreviations referred to organizations such as the broadcasting corporations in The Netherlands and Belgium and references to COWltries such as the USA USSR and UK When attending high school the HBS after the war my knowledge of acronyms grew slowly Even during the ten years I spent in the Dutch Merchant Marine the GHV the number of acronyms was limited to advanced equipment that eventually became known as RADAR LORAN and DECCA **Field Materials Manual**, 2011 **Scientific and Technical Aerospace Reports**, 1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Pearl Oyster Health Management** Melba G. Bondad-Reantaso, Sharon Elizabeth McGladdery, Franck C. J. Berthe, 2007-01-01 The pearl oyster industry is a growing multibillion dollar sector of mollusk aquaculture Pearl farming occurs throughout Australasia the Middle East and South America Few species of mollusks possess the ability to produce pearls of gem quality The South Sea pearl oyster is one of them Pearl production in the wild is an unpredictable and uncontrolled event which human intervention through pearl culture has progressively overcome by improving culture practices Farming mother of pearls shares commonalities with edible mollusk aquaculture However the endproduct pearl production is unique to this sector In aquatic production health issues are of utmost importance pearl production is based entirely upon health The pearl itself is a product of the oyster's immune defenses as a response to soft tissue irritation Exploited stocks receive frequent handling stresses which

often predispose farmed animals to infection and diseases Therefore the importance of health management for pearl oysters is paramount Today most disease problems are caused by opportunistic pathogens taking advantage of oysters weakened by the stress of handling including pearl surgery and sub optimal growing conditions Except for the mass mortalities experienced in Japan the pearl oyster industry have not yet faced the types of epizootics which has impacted mollusk culture elsewhere in the world Development of the industry will inevitably lead to increased risk of disease introduction spread or emergence Against such an unwanted future health management is the critical defense line The objectives of this technical paper are to i review pearl oyster mortalities and disease problems in order to help design programs aimed at reducing the risks from diseases and ii provide technical guidance to pearl oyster farmers and the industry on management of pearl oyster health so that sector development will be sustainable not only in providing huge employment to communities where pearl farms are located but also contributing to maintain environmental integrity Pearl oyster farming can serve as environmental sentinels recognizing the fact that pearl oysters thrive only in pristine environment This publication contains three parts Part 1 consists of pearl oyster health the current interest in it and an overview of the cultured marine pearl industry Part 2 on pearl oyster health management consists of seven sections namely a introduction b general information on husbandry and handling hatchery production introductions and transfers c disease diagnostic protocols dealing with field collections of samples gross external examination gross internal examination and laboratory protocols d health zonation e disease outbreak protocols f national strategies on aquatic animal health and g references Certain countries in the pearl oyster producing regions have acquired a great deal of experience in health management of cultured species Experiences from Australia the Cook Islands Japan the French Polynesia the Philippines China the Persian Gulf and the Red Sea are included in Part 3 which also contains a general review of pearl oyster mortalities and disease problems Publisher s description **Proceedings of the 37th Annual Professional Development Conference** American Society of Safety Engineers,1998 *School Management* Joseph Landon,1889 **Federal Register** ,2013-06 *School Management Including a General View of the Work of Education, with Some Account of the Intellectual Faculties from the Teacher's Point of View* Joseph Landon,1883
