The New Politics of Surveillance and Visibility

Richard V. Ericson, Kevin D. Haggerty, 2006-01-01 Since the terrorist attacks of September 2001 surveillance has been put forward as the essential tool for the war on terror with new technologies and policies offering police and military operatives enhanced opportunities for monitoring suspect populations The last few years have also seen the public's consumer tastes become increasingly codified with data mines of demographic information such as postal codes and purchasing records Additionally surveillance has become a form of entertainment with reality shows becoming the dominant genre on network and cable television In *The New Politics of Surveillance and Visibility* editors Kevin D Haggerty and Richard V Ericson bring together leading experts to analyse how society is organized through surveillance systems technologies and practices They demonstrate how the new political uses of surveillance make visible that which was previously unknown blur the boundaries between public and private rewrite the norms of privacy create new forms of inclusion and exclusion and alter processes of democratic accountability This collection challenges conventional wisdom and advances new theoretical approaches through a series of studies of surveillance in policing the military commercial enterprises mass media and health sciences

Transnational Companies and Security Governance Jana Hönke, 2013-08-21 This book investigates governance practiced by non state actors It analyses how multinational mining companies protect their sites in fragile contexts and what that tells us about political ordering beyond the state Based on extensive primary research in the Democratic Republic of Congo South Africa Europe and North America the book compares companies' political role in the 19th and 21st centuries It demonstrates

that despite a number of disturbing parallels many contemporary practices are not a reversion to the past but unique to the present The book discloses hybrid security practices with highly ambiguous effects around the sites of contemporary companies that have committed to norms of corporate social and security responsibility Companies invest in local communities and offer human rights training to security forces alongside coercive techniques of fortress protection and stability oriented clientele practice and arrangements of indirect rule The book traces this hybridity back to contradictory collective meaning systems that cross borders and structure the perceptions and choices of company managers private security officers NGO collaborators and others practitioners The book argues that hybrid security practices are not the result of an encounter between a supposed local with the liberal global Instead this hybridity is inherent in the transnational and part and parcel of liberal transnational governance Therefore more critical reflection of global governance in practice is required These issues are sharply pertinent to liberal peacebuilding as well as global governance more broadly The book will be of interest to anyone interested in business politics and human rights critical security studies peacebuilding and statebuilding African politics and ethnographic and sociological approaches to global governance and international relations more generally

Who's Watching You? John Gibb, Mack Farren, 2007-05-01 The threat of terrorism and the corresponding climate of fear encouraged by the government have together eroded our freedom to live our lives in peace and quiet away from the prying eyes of hidden cameras The government is tightening its grip on us by watching and recording what we do They are doing this because they know they can and because knowledge is power But exactly who are they and why do they want to know so much about us This book includes chilling accurate and up to date descriptions of the methods the government and private company proxies use to watch us
