Survey Cloud Computing Security Assessment:

Survey on Cloud Computing Security Risk Assessment Ishraga khogali, 2015-05-27 Essay aus dem Jahr 2015 im Fachbereich Informatik Allgemeines Sprache Deutsch Abstract Cloud computing is a new computing technology which has attracted much attention Unfortunately it is a risk prone technology since users are sharing remote computing resources data is held remotely and clients lack of control over data Therefore assessing security risk of cloud is important to establish trust and to increase the level of confidence of cloud service consumers and provide cost effective and reliable service and infrastructure of cloud providers This paper provides a survey on the state of the art research on risk assessment in the cloud environment *Security and Risk Analysis for Intelligent Cloud Computing* Ajay Kumar, Sangeeta Rani, Sarita Rathee, Surbhi Bhatia, 2023-12-19 This edited book is a compilation of scholarly articles on the latest developments in the field of AI Blockchain and ML DL in cloud security This book is designed for security and risk assessment professionals and to help undergraduate postgraduate students research scholars academicians and technology professionals who are interested in learning practical approaches to cloud security It covers practical strategies for assessing the security and privacy of cloud infrastructure and applications and shows how to make cloud infrastructure secure to combat threats and attacks and prevent data breaches The chapters are designed with a granular framework starting with the security concepts followed by hands on assessment techniques based on real world studies Readers will gain detailed information on cloud computing security that until now has been difficult to access This book Covers topics such as AI Blockchain and ML DL in cloud security Presents several case studies revealing how threat actors abuse and exploit cloud environments to spread threats Explains the privacy aspects you need to consider in the cloud including how they compare with aspects considered in traditional computing models Examines security delivered as a service a different facet of cloud security **Cloud Computing Security** Dinesh G. Harkut, 2020-09-16 Cloud computing is an emerging discipline that is changing the way corporate computing is and will be done in the future Cloud computing is demonstrating its potential to transform the way IT based services are delivered to organisations There is little if any argument about the clear advantages of the cloud and its adoption can and will create substantial business benefits through reduced capital expenditure and increased business agility However there is one overwhelming question that is still hindering the adaption of the cloud Is cloud computing secure The most simple answer could be Yes if one approaches the cloud in the right way with the correct checks and balances to ensure all necessary security and risk management measures are covered as the consequences of getting your cloud security strategy wrong could be more serious and may severely damage the reputation of organisations *Analysis of Data Security & Management In Hybrid Cloud Computing Environment*. Dr. Ashad ullah Qureshi, 2022-06-01 Companies offering services on the Internet have led corporations to shift from the high cost of owning and maintaining stand alone privately owned and operated infrastructure to a shared infrastructure model These shared infrastructures are being offered by infrastructure

service providers which have subscription or pay on demand charge models presenting compute and storage resources as a generalized utility Utility based infrastructures that are run by service providers have been defined as cloud computing by the National Institute of Standards and Technology In the cloud computing model the concerns of security and privacy protections are exacerbated due to the requirement for an enterprise to allow third parties to own and manage the infrastructure and be custodians of the enterprises information With this new architectural model there are new hybrid governance models designed to support complex and uncertain environments
