Making the Sustainable University Katie Leone, Simeon Komisar, Edwin M. Everham III, 2021-05-21 This book documents strategies for universities engaging sustainability challenges through the education of global citizens on topics such as climate change habitat alteration species loss resource depletion and contamination food access and sovereignty economic equity and energy use Different disciplines and operational units often have disparate ideas in mind when they work toward advancing sustainability For example some disciplines focus on environmental challenges identifying impacts to ecosystems mitigation and remediation strategies some on greening of industrial and commercial practices while others address social equity often there is little effort to connect these pieces especially while considering economic impacts This book examines how Florida Gulf Coast University has attempted to infuse sustainability across curricula and operations as an integrated concept and our successes and shortcomings are instructional for sustainability practitioners on college campuses and other industries in a wide audience

Sustainable Value Chain Management François Maon, Sankar Sen, 2016-04-01 The way organizations manage their value chain has changed dramatically over the past decade Today organizations take account of economic issues but they also adopt a broader perspective of their purpose including social and environmental issues Yet despite its global spread sustainable value chain management remains an uncertain and poorly defined ambition with few absolutes The social and environmental issues that organizations should address easily can be interpreted as including virtually everything Current literature on the topic seeks to understand the effects and management of initiatives dealing with diversity human rights safety philanthropy community and environment However the penetration of social and environmental considerations into value chain management is

described as desire lacking reality thereby making the idea a patchy success The objective of this research anthology is to investigate different angles of sustainable value chain management The book s 27 chapters fill holes and explore new fields the chapters are organised in five sections Sustainable value chains context drivers and barriers Sustainable value chains managing activities Sustainable value chains managing networks and collaboration Sustainable value chains integrative perspectives and Sustainable value chains specific sectorial and industry perspectives
