*The Routledge Companion to Gender and Science Fiction* Lisa Yaszek, Sonja Fritzsche, Keren Omry, Wendy Gay Pearson, 2023-02-10 The Routledge Companion to Gender and Science Fiction is the first large scale reference work of its kind critically assessing the relations of gender and genre in science fiction SF especially but not exclusively as explored in speculative art by women and LGBTQ artists across the world This global volume builds

upon the traditions of interdisciplinary inquiry by connecting established topics in gender studies and science fiction studies with emergent ideas from researchers in different media. Taken together they challenge conventional generic boundaries, provide new ways of approaching familiar texts, recover lost artists and introduce new ones, connect the revival of old hate-based politics with the increasing visibility of imagined futures for all, and show how SF stories about new kinds of gender relations inspire new models of artistic, technoscientific and political practice. Their chapters are grouped into five conversations about the history of gender and genre, theoretical frameworks, subjectivities, medias and transmedialities and transtemporalities that are central to discussions of gender and SF in the current moment. A range of both emerging and established names in media literature and cultural studies engage with a huge diversity of topics including eco criticism, animal studies, cyborg and posthumanist theory, masculinity, critical race studies, Indigenous futurisms, Black girlhood and gaming. This is an essential resource for students and scholars studying gender, sexuality and/or science fiction.

This Companion offers students and scholars a comprehensive introduction to the development and the diversity of the American short story as a literary form from its origins in the eighteenth century to the present day. Rather than define what the short story is as a genre or defend its importance in comparison with the novel, this Companion seeks to understand what the short story does, how it moves through national space, how it is always related to other genres and media, and how its inherent mobility responds to the literary marketplace and resonates with key critical themes in contemporary literary studies. The chapters offer authoritative introductions and reinterpretations of a literary form that has re-emerged as a major force in the twenty-first century public sphere dominated by the Internet.

*The Ecology of American Noir* Katrina Younes, 2025-04-07. This volume investigates the relationship between the conventions of noir fiction and film and its subtypes in relation to environmental crises. Dr Younes addresses questions that not only allow readers to re-read early hardboiled literature and neo-noir films but also help identify a new subgenre of noir and develop an ecocritical methodology, eco-noir. This text traces the development of strategies of mapping urban blight and environmental deterioration in classic hardboiled fiction of the 1940s, neo-noir films of the 1970s and eco-noir texts of the post-millennial period. Introducing the concept of eco-noir as both a subgenre and fictional form as well as a methodology, the volume develops a new way of understanding the relationship between noir and climate fiction texts. Through a close reading of hardboiled, neo-noir and eco-noir texts including those by Dashiell Hammett, Raymond Chandler, Robert Towne, Kim Stanley

Robinson and Jeff VanderMeer it asks and addresses the question how does each sub genre of noir map the noir atmosphere of the private investigator's natural setting in terms of environmental toxicity The Ecology of American Noir contributes to critical conversations in both noir and ecocritical scholarship making clear how a new understanding of noir as defined through environmental and atmospheric conditions invites readers viewers and scholars of the genre to generate meaningful dialogues about our decaying and deteriorating environment Fiction and the Sixth Mass Extinction Jonathan Elmore,2020-04-01 Fiction and the Sixth Mass Extinction is one of the first works to focus specifically on fiction's engagements with human driven extinction Drawing together a diverse group of scholars and approaches this volume pairs established voices in the field with emerging scholars and traditionally recognized climate fiction cli fi with texts and media typically not associated with Anthropocene fictions The result is a volume that both engages with and furthers existing work on Anthropocene fiction as well as laying groundwork for the budding subfield of extinction fiction This volume takes up the collective insistence on the centrality of story to extinction studies In various and disparate ways each chapter engages with the stories we tell about extinction about the extinction of animal and plant life and about the extinction of human life itself Answering the call to action of extinction studies these chapters explore what kinds of humanity caused this event and what kinds may live through it what cultural assumptions and values led to this event and which ones could lead out of it what relationships between human life and this planet allowed the sixth mass extinction and what alternative relationships could be possible **The Cambridge Companion to Literature and Climate** Adeline Johns-Putra,Kelly Sultzbach,2022-04-07 This volume unfolds the complex relationship between literature and climate by uniquely illuminating historical complexity diverse viewpoints and emerging issues **Ecology & Environment Quick Revision Material for UPSC & State PSC General Studies Exams** Disha Experts,2021-08-01 Geography, Ecology & Environment Quick Revision Material for UPSC & State PSC General Studies Exams Disha Experts,2021-08-01
