Supercritical Carbon Dioxide Separations And Processes Acs Symposium Series:

Biotechnology for Pulp and Paper Processing Pratima Bajpai, 2018-02-14 The book provides the most up to date information available on various biotechnological processes useful in the pulp and paper industry The first edition was published in 2011 covering a specific biotechnological process or technique discussing the advantages limitations and prospects of the most important and popular processes used in the industry Many new developments have taken place in the last five years warranting a second edition on this topic The new edition contains about 35% new material covering topics in Laccase application in fibreboard biotechnology in forestry pectinases in papermaking stickies control with pectinase products from hemicelluloses value added products from biorefinery lignin use of enzymes in mechanical pulping

Bioseparation Processes in Food Singh, 1995-05-16 Offers in depth coverage of the latest advances in new and traditional separation technologies as they are used in a variety of ways to produce value added products Examines both fundamental and applied aspects of separation techniques *25th Annual Conference on Composites, Advanced Ceramics, Materials, and Structures - B, Volume 22, Issue 4* Mrityunjay Singh, Todd Jessen, 2009-09-28 This volume is part of the Ceramic Engineering and Science Proceeding CESP series This series contains a collection of papers dealing with issues in both traditional ceramics i e glass whitewares refractories and porcelain enamel and advanced ceramics Topics covered in the area of advanced ceramic include bioceramics nanomaterials composites solid oxide fuel cells mechanical properties and structural design advanced ceramic coatings ceramic armor porous ceramics and more Polymer Processing with Supercritical Fluids Vannessa Goodship, Erich Ogur, 2004 SCFs are currently the subjects of intense research and commercial interest Applications such as the RESS rapid expansion of supercritical fluid solutions process are part of standard industrial practice In view of their ever growing importance in the polymer industry there is a need to fully comprehend how supercritical fluids interrelate with polymeric materials to realise the potential that can be gained from their use The authors review the basic principles of SCFs and their application within the polymer industry characteristics and properties extraction of unwanted residual products polymerisation solvents and polymer impregnation Processing applications such as plasticisation foaming and blending are also considered There is discussion of the potential within the polymer recycling industry for use of SCFs as cleaning agents or within supercritical oxidation processes Around 400 references with abstracts from recent global literature accompany this review sourced from the Polymer Library to facilitate further reading A subject index and a company index are included **Ionic Liquid-Based Surfactant Science** Bidyut K. Paul, Satya P.

Moulik, 2015-09-21 This volume will be summarized on the basis of the topics of Ionic Liquids in the form of chapters and sections It would be emphasized on the synthesis of ILs of different types and stabilization of amphiphilic self assemblies in conventional and newly developed ILs to reveal formulation physicochemical properties microstructures internal dynamics thermodynamics as well as new possible applications It covers Topics of ionic liquid assisted micelles and microemulsions in

relation to their fundamental characteristics and theories Development bio ionic liquids or greener environment friendly solvents and manifold interesting and promising applications of ionic liquid based micelles and micremulsions

Separations for the Nuclear Fuel Cycle in the 21st Century Gregg J. Lumetta, 2006 This book focuses on assessing the current state of the art in nuclear separations science and technology and on identifying R D directions required to enable nuclear separations to meet 21st Century demands for waste minimization environment protection safety and security

Supercritical Fluid Technology in Materials Science and Engineering Ya-Ping Sun, 2002-03-26 This title analyzes the chemical reactions structures and fundamental properties of supercritical fluid systems for the production of new compounds nanomaterials fibers and films It compiles contemporary research and technological advances for increased selectivity and reduced waste in chemical industrial pharmaceutical and biomedical applications Topics include fluid dynamics catalysis hydrothermal synthesis surfactants conducting polymers crystal growth and other aspects and applications of supercritical fluids

Supercritical Fluid Technology for Energy and Environmental Applications Vladimir Anikeev, Maohong Fan, 2013-12-21 *Supercritical Fluid Technology for Energy and Environmental Applications* covers the fundamental principles involved in the preparation and characterization of supercritical fluids SCFs used in the energy production and other environmental applications Energy production from diversified resources including renewable materials using clean processes can be accomplished using technologies like SCFs This book is focused on critical issues scientists and engineers face in applying SCFs to energy production and environmental protection the innovative solutions they have found and the challenges they need to overcome The book also covers the basics of sub and supercritical fluids like the thermodynamics of phase and chemical equilibria mathematical modeling and process calculations A supercritical fluid is any substance at a temperature and pressure above its critical point where distinct liquid and gas phases do not exist At this state the compound demonstrates unique properties which can be fine tuned making them suitable as organic solvents in a range of industrial and laboratory processes This volume enables readers to select the most appropriate medium for a specific situation It helps instructors prepare course material for graduate and postgraduate courses in the area of chemistry chemical engineering and environmental engineering And it helps professional engineers learn supercritical fluid based technologies and use them in solving the increasingly challenging environmental issues Relates theory chemical characteristics and properties of the particular supercritical fluid to its various applications Covers the fundamentals of supercritical fluids like thermodynamics of phase and chemical equilibria mathematical modeling and process calculations Includes the most recent applications of supercritical fluids including energy generation materials synthesis and environmental protection

Performance Characteristics of a Continuous Supercritical Carbon Dioxide Separation System Coupled with Adsorption Sangbin Lim, 1992
