Sustainable Building Guidelines:

Sustainable Building Standards and Guidelines for Mixed-Use Buildings Ranjit Gunewardane, 2018-09-29 With increasing numbers of consumers becoming more environmentally conscious in their purchasing behavior environmental practices are a decisive factor in the real estate sector Reconciling the seemingly opposing goals of improving the environment and providing the needed infrastructure to support economic growth is the origin of the sustainable green building concept This concept is simply about being mindful of the potential impact that the design construction and operation of commercial buildings will have on the environment and devising innovative strategies to mitigate or eliminate these impacts This means changing the traditional process of designing buildings and their construction and operation as well as the integration of emerging trends in many technology fields into buildings The Sustainability Building Standards and Guidelines contains information intended as minimum standards for designing constructing and equipping sustainable mixed use buildings Insofar as practical these standards relate to desired performance or results or both Sustainable green buildings are as much about construction as they are about design The book includes a description of the special design features construction processes the systems of operation and maintenance and the interrelationships of these various functions Increasingly staying competitive means building owners property developers designers manufacturers and contractors are focused on achieving increasingly environmentally friendly and energy efficient buildings with the ultimate goal of producing environmentally and energy neutral buildings **Sustainable Design Guidelines** ,2018 *Guide to Green Building Rating Systems* Linda Reeder, 2010-03-29 The one stop guide for choosing a green building rating system Today sustainability is a growing concern for the architects designers builders and owners of commercial and residential buildings Meeting the requirements of a rating system provides a metric to evaluate and set priorities But the variety and complexity of methods available to assess the eco friendliness of a building can seem overwhelming Guide to Green Building Rating Systems informs readers about the rating system selection process Comparing essential issues such as cost ease of use and building performance this book offers solid guidance that will help readers find the rating system that best fits their needs This easy to follow reference includes An overview of the major national rating systems including LEED Green Globes the National Green Building Standard and ENERGY STAR An in depth look at each rating system including its evolution objectives point structure levels of certification benefits and shortcomings How the ratings systems work for different types of buildings commercial multi family residential and single family residential construction Illustrated case studies from different climate regions with project descriptions cost data and lessons learned by design teams constructors and owners An overview of local regional and international rating systems Guide to Green Building Rating Systems demystifies complex material making this book an essential reference for building professionals engaged in or wishing to pursue sustainable building practices *Green Building Guidelines* ,2003 *The Complete Guide to Green Building & Remodeling Your Home* Martha

Maeda,2011 In today s economy and socially conscious environment regarding the environment many people cannot afford not to start considering ways they can build or remodel their home to ensure it is green With scientific sources such as the UN council on global warming making statements about the degradation of ice flow and environmental conditions by 2050 and the likelihood that crude oil sources will be used up within the next fifty years it is especially necessary for young families to consider the implications of re examining their homes and living situations to be more green This book will guide you and your family through the process of learning more about and implementing the necessary changes and perspectives needed to change your home or build a new home that is environmentally conscious and prepared for the changing economic and environmental climate in the coming decades You will learn why people have started to build green and how it can be done in today s regulatory and cost conditions quickly and inexpensively You will learn how to remodel with green in mind and how to start working with building professionals that can provide the necessary materials plans and paperwork you need to proceed You will learn which materials are best for green building by lifespan and how to choose between various green materials You will learn how to not only use green materials but to make sure the construction process is green as well You will learn the basics of framing your building natural building methods the energy systems you might use and the heating cooling options at your disposal Construction and environmental experts have been interviewed and their expertise is included in this book to help you learn everything you need to accomplish the above as well as to know what kinds of water and waste systems are best how to site plan and landscape your home and what the most common myths about green building are You will learn ten things you can do on any building project to keep it green and any materials you should always have on hand for anything you do around the house Regardless of whether you are just looking to remodel to make your house greener or are building a new home this book will give you everything you need to stay green and respect the environment with your home

Environmentally Sustainable Building Design Guidelines ,2008

Sustainable Building - Design Manual ,2004-01-01 This first volume of Sustainable building design manuals focuses on policy and regulatory mechanisms and serves as a guide to policy makers and local authorities

Guideline for sustainable, energy efficient architecture and construction Rückert, Klaus,Shahriari, Effatolsadat,2014-07-22 Nowadays there is an ever growing awareness regarding inevitable importance of sustainable development and its sub topics such as environment protection ecology resource saving energy efficiency etc Due to massive and rapid development in recent years this topic is getting more crucial in developing countries for instance Iran It is getting more obvious that most of the development activities in absence of precise analysis of current conditions as well as consequences of such activities will lead to devastation of natural resources The resources that is essential for further

development of the country Therefore It is necessary to deal with sustainable development and environmental issues from the broader perspective where includes items underlying immediate causes of environmental impact and at the same time tries to improve them Sustainability or sustainable development is an umbrella covering many issues and aspects among them energy which is the key item because energy consumption of buildings could have an impact on environment more than other aspects Considering the huge portion of energy consumption in construction industry and housing sector paying special attention to improvements in this sector is essential Following this goal the aim of this publication is to highlight procedures and practices which promote sustainable construction that is about creating a better quality of building and more healthy places to live in Procedure of sustainable design includes various approaches and methods to develop energy efficient and environmentally sensitive buildings Such approaches and methods demonstrate how to design develop and construct all buildings in general and residential buildings in particular Among various approaches towards sustainability Passive solar strategies are well known thanks to their cost efficiency and context friendliness of its principals and measures The approach of passive design architectural strategies could be considered as the most applicable approach for resource saving and sustainability thinking about special situation of Iran in particular and the Mena region in general Such an approach requires paying special attention to climate social characteristics of current or prospective inhabitants topographical physical characteristics as well as architectural characteristics of the understudied area The relationships and interactions among society building and its architecture and climate is Site specific and dynamic Therefore they should be studied and properly analyzed throughout a specific project process for each certain place The most expecting outcomes are precise definitions of passive design strategies generally for buildings in MENA Region and especially for Iran This publication is prepared in the young cities project framework as the reasonable outcome of the developed pilot projects The book starts with introducing the target group related definitions and a brief overview on a conventional approach and its impact on environment This chapter ends up with a brief review on benefits of applying sustainable guidelines As the next step after analyzing the climate and its relationship with thermal comfort and building the main principals of passive solar design are introduced The selected principles are orientation day lighting shading thermal mass insulation and ventilation After a brief introduction of the principals each one is explained in detail through its general principles and design strategies Sustainable construction is examined based on its main pillars construction systems building elements ecological building materials and applicable measures for building physis Construction systems are sorted out in six main groups as block work brick infill block work lightweight block infill conventional panels light weight steel frame tunnel form structural system and precast modular All selected systems are introduced based on following factors brief description of the building concept factory production insulation wastage finishes labor installation transport lifting services hydronic cooling heating and safety Then main building elements are examined Here the elements are limited to foundations walls floors roofs doors and windows After a

short description different types of each element are introduced Ecological building materials are investigated in chapter four To find a base to compare several common criteria are selected such as embodied energy pollution and waste local production reusability and recyclability durability and interdependency Applicable measures for building physic are examined in chapter five The selected main measures are as follows insulation glazing thermal mass day lighting shading ventilation and air tightness After describing the general principles of each measure several recommendations in frame of design considerations are provided Die enorme Bedeutung nachhaltiger Projekte wie Umweltschutz kologie sparsamer Umgang mit Rohstoffen Energieeffizienz usw dringt immer st rker in unser Bewusstsein Aufgrund der massiven und rasanten Entwicklung in den Schwellenl ndern z B Iran gewinnen Umweltschutz und Nachhaltigkeit immer mehr an Relevanz Ein einseitiges Wirtschaftswachstum ohne Ber cksichtigung kologischer und klimatischer Bedingungen verursacht die Zerst rung der Umwelt und Rohstoffe Ressourcen die f r die weitere Entwicklung der L nder unverzichtbar sind Es ist unumg nglich sich umfassend mit nachhaltiger Entwicklung und kologischen Aspekten auseinanderzusetzen die unmittelbaren Auswirkungen auf die Umwelt zu erfassen und gleichzeitig M glichkeiten einer Optimierung aufzuzeigen Nachhaltigkeit und Umweltschutz erfassen eine Vielzahl von Themen und Aspekten u a den Energieverbrauch ein wesentlicher Faktor da der Energieverbrauch in Geb uden den gr ten Einfluss auf die Umweltbilanz hat In Anbetracht des enormen Energieverbrauchs in Bauwirtschaft und Wohnungsbau ist es unerl sslich gerade in diesem Bereich eine Optimierung in der weiteren Entwicklung zu verfolgen Diesem Ziel folgend werden in dieser Publikation Verfahren und Methoden f r nachhaltige Bauweisen unter Ber cksichtigung einer besseren Bauqualit t und gesundheitlicher Aspekte erl utert Die Ma nahmen nachhaltigen Designs beinhalten verschiedene Ans tze und Methoden energieeffiziente und umweltfreundliche Geb ude zu entwickeln Sie zeigen Entwurf Konstruktion und bauliche Ausf hrung von Geb uden im Allgemeinen und Wohngb uden im speziellen Neben den verschiedenen Ans tzen sind die passive solar strategies die wohl namhaftesten Methoden da diese sehr rentabel und daher f r Bauherren attraktiv sind Angesichts der speziellen Situation im Iran im Besonderen und der MENA Region im Allgemeinen k nnten die passiven Design Architektur Strategien als eine der am besten anzuwendenden Methoden f r Rohstoffeffizienz und Nachhaltigkeit betrachtet werden Dies setzt eine besondere Ber cksichtigung des dortigen Klimas der sozialen Charakteristiken derzeitiger oder zuk nftiger Einwohner als auch der topographisch physischen und architektonischen Charakteristiken der betroffenen Region voraus Beeinflussung und Beziehungen zwischen Gesellschaft Geb uden Architektur und Klima sind lokal spezifisch und dynamisch Deshalb sollten diese Faktoren f r jeden Standort neu gepr ft und analysiert werden Die Resultate dieser Analysen allgemein f r Geb ude in der MENA Region und im Besonderen im Iran zeigen deutlich die berlegenheit von passiven Designstrategien Diese Publikation ist das Resultat der entwickelten Pilotprojekte im Rahmen des Young Cities Projektes Sie beginnt mit der Vorstellung der Zielgruppe relevanten Definitionen und einem kurzem berblick des konventionellen Ansatzes und dessen Einfluss auf die Umwelt Das Kapitel endet mit einem kurzen R ckblick ber

den Nutzen nachhaltiger Bauweise Nach Analyse des Klimas und seine Beziehung zu thermischem Komfort und Gebäuden werden die wichtigsten Prinzipien passiver Solarenergie vorgestellt Orientierung Tageslicht Schatten thermale Masse Isolierung und Ventilierung ihre Grundlagen und Designstrategien detailliert erläutert Nachhaltige Konstruktion und deren Hauptpfeiler Bausysteme Bauelemente ökologische Bauelemente und anwendbare Maßnahmen für die Bauphysik werden anschließend beleuchtet Dabei wurden die Konstruktionssysteme in sechs Hauptgruppen gegliedert Ziegeleinflung leichtgewichtige Ziegeleinflung klassische Flurnde leichtgewichtige Stahlrahmen tunnelförmige Struktursysteme und vorgefertigte Modelle Anhand folgender Faktoren werden diese eingehend dargestellt Baukonzepts Fabrikproduktion Isolierung Abnutzung Verarbeitung Arbeitsaufwand Installation Transport Beförderung Services hydronische Khlung Heizung und Sicherheit Die Hauptbauelemente wie Unterbau Wände Boden Decken Treppen und Fenster werden beschrieben und verschiedene Baureihen dieser vorgestellt Das vierte Kapitel befasst sich mit ökologischen Baumaterialien Um hierbei eine vergleichbare Basis zu finden wurden gemeinsame Kriterien ausgewählt graue Energie Verschmutzung und Abfall lokale Produktion Wiederverwendung und Recycling Nachhaltigkeit und Interdependenzen Im fünften Kapitel werden anwendbare Maßnahmen für die Bauphysik wie Isolierung Lasur Wärmemasse Tageslicht Schatten Ventilation und Luftdichte untersucht deren Grundlagen beschrieben und Empfehlungen bezüglich der Gestaltung präsentiert

Towards Sustainable Building N. Maiellaro, 2013-03-14 This volume contains the extended versions of selected papers presented at the first Mediterranean Conference Sharing Knowledge on Sustainable Building held at the Polytechnic of Bari in December 1999 supported by the National Research Council of Italy The publication of this book was made possible through the efforts of the contributing Authors Other people have provided invaluable support for the conference and for the preparation of this volume in particular I wish to thank Antonella Lerario for providing support in the final editing of the text and images 1 As reported in Boonstra and Rovers 2001 people spend a great deal of time inside buildings therefore decisions about design construction use maintenance renovation demolition reuse and recycling of buildings have a huge impact on the sustainable development of our society Technical aspects however should be supported by adequate policies developed with appropriate tools and driven by meaningful challenges For people involved in sustainable buildings the conceptual frameworks studies and experiences collected in this volume organized into three parts Policies Tools and Challenges will help to advance knowledge allowing them to adopt and more efficiently implement such innovations sooner

Right here, we have countless books **Sustainable Building Guidelines** and collections to check out. We additionally manage to pay for variant types and along with type of the books to browse. The within acceptable limits book, fiction, history, novel, scientific research, as without difficulty as various further sorts of books are readily manageable here.
