

A vibrant, cartoon-style illustration on a light blue background. The central focus is a white rounded rectangle containing the text "AI in Everyday Life". The word "AI" is in large blue letters, with a black square frame around it. "in" is in black, and "Everyday Life" is in black and blue. Surrounding the rectangle are various icons: a boy's face in a circle at top left, a speech bubble, a gear, a robot head at top right, a small robot head to the left of the text, a globe at bottom right, a Wi-Fi symbol, a girl's face in a circle at bottom right, a paperclip at bottom left, and a menu icon at bottom left. A blue button with the text "Get started" is at the bottom center of the white rectangle.

ARTIFICIAL INTELLIGENCE: A MODERN APPROACH IN DIFFERENT FIELDS Prof. Rashmi Pant , Dr. Vibha Pandey & Dr. Pradeep Pandey,2024-12-16 While highlighting the advantages of Artificial intelligence AI in enhancing human memory creativity and decision making in daily life the review paper also notes the difficulties and vulnerabilities involved in implementing AI The encoding storing and retrieval of our experiences are powered by human memory AI has the ability to both facilitate and impede memory encoding and retrieval as well as aid in our knowledge of the problems facing memory research An artist s own creative abilities may be compromised if they depend too much on AI generated features When AI systems offer ready to eat concepts people could become unduly dependent on them rather than making their own

independent creative thought processes **Towards HRI of Everyday Life** Karolina Zawieska, Mohammad Obaid ,Wafa Johal, Jessica Sorenson, Catharina Vesterager Smedegaard, Glenda Hannibal, 2025-10-03 Presently it is often assumed that at least in principle robots and social robots in particular have the potential to increase human well being across a wide range of sectors and application areas At the same time efforts to introduce such systems into our everyday environments have had only limited success and it is yet to be seen whether the impact of social robots on our daily lives professional and private will actually be beneficial Therefore there is a need to systematically address and study the long term use and presence of social robots in everyday environments where humans not only interact with robots but also have them integrated into the totality of their lived experiences in everyday life One of the main ways to investigate human engagement with social robots in everyday environments is through HRI studies conducted in the wild While such an approach has certainly been instrumental to and is increasingly used in HRI research we propose here to further expand the underlying theoretical and methodological frameworks to address the notion of everyday life The latter is viewed here as a useful concept and an umbrella term that allows us to address not only specific application domains for robots but also the continuity and totality of human lived experiences that emerge through long term engagement with social robots in everyday life contexts Placing social robots in everyday settings has often been an explicit goal for robot development however the notion of everyday life has yet to be systematically analysed and addressed in this context Therefore this Research Topic aims to bring together a wide range of disciplinary and interdisciplinary contributions to further develop the HRI domain **Artificial Intelligence Class 6**
