Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development

International Handbook of Educational Leadership and Social (In)Justice Ira Bogotch, Carolyn M. Shields, 2013-11-11 The International Handbook on Educational Leadership and Social In Justice creates a first of its kind international forum on conceptualizing the meanings of social justice and leadership research approaches in studying social justice and combating social injustices school university and teacher leadership for social justice advocacy and advocates for social justice socio cultural representations of social injustices global policies and leadership development as interventions The Handbook is as much forward looking as it is a retrospective review of educational research literatures on social justice from a variety of educational subfields including educational leadership higher education academic networks special education health education teacher education professional development policy analyses and multicultural education The Handbook celebrates the promises of social justice while providing the educational leadership research community with concrete contextualized illustrations on how to address inequities and combat social political and economic injustices through the processes of education in societies and educational institutions around the world

International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, Judith Chapman, P. Corson, P. Hallinger, Ann Hart, 2012-12-06 EDITORS This introduction to the International Handbook of Educational Leadership and Administration describes some of the motivation for developing the book and several assumptions on which is based much of the work represented in its 31 chapters A synopsis of the contents of those chapters is also provided SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail After all there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years Such a view is captured for example in Bennis observation that Of all the hazy and confounding areas in social psychology

leadership theory undoubtedly contends for top nomination. Probably more has been written and less is known about leadership than any other topic in the behavioural sciences (1959, page 259). We do not find this state of affairs discouraging nor entirely accurate and of course it did not prevent Bennis from proceeding either. One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory, a theory which applies to all or most domains of organized human activity. This aspiration inevitably produces decontextualized and therefore abstract categories of practice. Howard Gardner's (1995) depiction of leadership as story telling is a case in point.
