Ketogenic Tim Noakes, Tamzyn Murphy, Neville Wellington, Hassina Kajee, Jayne Bullen, Sarah Rice, Candice Egnos, 2023-06-22 Selected for Doody's Core Titles 2024 in Nutrition. Ketogenic: The Science of Therapeutic Carbohydrate Restriction in Human Health presents the most up-to-date and evidence-based science and research available in the field of TCR with the purpose of training medical and allied healthcare professionals on the effective therapeutic use of low carbohydrate and ketogenic nutrition in clinical practice. This book explores the appropriate safe and effective use of TCR to improve patient outcomes in a broad range of chronic metabolic conditions and aims to promote health. Focused on lifestyle management, health support, and the treatment of diseases rooted in poor nutrition, this book explores the role of food and lifestyle modification as medicine and is a valuable resource for nutritionists, dietitians, and medical professionals who provide diet-related counselling, as well as those researching or studying related areas. Presents new best practice guidelines for using TCR to treat, improve, or reverse nutrition-related metabolic conditions and diseases that were previously thought to have a chronic irreversible progression. Provides an overview of the most recent evidence outlining the biochemistry and physiology pertaining to human nutrition and health. Offers evolutionary and historical context to human nutrition. Contains clinical practice guidelines for the implementation of TCR from medical practitioners who prescribe TCR in their practices, allowing readers to understand real-life concerns in the field. Features case studies that provide practical examples of how to assess, monitor, and intervene with patients that practitioners encounter in their practices. Explains the physiology and biochemistry of the normal and pathophysiological state for each condition and links these to the application of TCR.

Trends in Nutrition Research Tony P. Starks, 2006 This work talks about the taking in and use of food and other nourishing material by the body. Nutrition is a 3-part process. First, food or drink is consumed. Second, the body breaks down the food or drink into nutrients. Third, the nutrients travel through the bloodstream to different parts of the body where they are used as fuel and for many other purposes. To give the body proper nutrition, a person has to eat and drink enough of the foods that contain key nutrients. This new book examines new research in this field which is belatedly receiving the proper attention.
