Global Science Fiction Gary

Westfahl, 2025-06-09 Science fiction represents a diverse community of writers and readers that spans the entire world. This collection provides a global tour of the genre with essays about Latin American, European, African, Arabic, Indian, Japanese, and Chinese science fiction, providing insights about how writers around the world have explored and reinvigorated the genre. Essays by prominent critics from five continents inform about particular cultures and analyze representative texts by authors such as Tobias S. Buckell, Lourenço Mutarelli, Stanislaw Lem, Masande Ntshanga, Tawfiq Al Hakim, Anil Menon, and Cixin Liu. The contributing scholars examine how national experiences have shaped these narratives, which often differ strikingly from Anglo-American science fiction. An introductory survey of foreign language science fiction in the United States endeavors to explain why so many of these texts have remained unknown to Anglophone readers. An extensive bibliography lists numerous resources for further study of science fiction from various parts of the world.

Future Yet to Come Sonja M. Kim, Robert Ji-Song Ku, 2021-09-30 South Korea is home to cutting edge electronics, state of the art medical facilities, and ubiquitous high speed internet. The country's meteoric rise from the ashes of the Korean War, 1950-1953, to rank among the world's most technologically advanced societies is often attributed to state led promotion of science and technology in nation building projects. With chapters that discuss Korea's dynastic past, foreign occupations, Cold War geopolitics, postwar rehabilitation in the twentieth century, and the contemporary neoliberal moment, *Future Yet to Come* argues that a longer historical arc and broader disciplinary approach better elucidate these transformations. The book's contributors illuminate the sociotechnical imaginaries that promoted sustained and contested Korea's scientific, medical, and technological projects in realizing desired futures. Focusing special attention on visual culture and the life sciences, the essays present competing visions held by individuals and institutions of power in the use and purpose of scientific engagements. They demonstrate Korean specificities in culture and language and the myriad social, political, spatial, and symbolic arrangements that shaped incorporations of and changes to existing systems of knowledge and material practices. Whether discussing moral epistemologies, imperialist or developmentalist thrusts in public health regimes, or new configurations of the self enabled by bio industries and media technologies, the book expands both the regional and global understanding of translation, accommodation, and transfer. Tracing imaginaries across the vicissitudes of Korea's past, recalls their history, and makes visible their shifts and resilience in dynamic political economies. *Future Yet to Come* reminds us how deeply intertwined science, medicine, and technology are to not only our politics, corporations, and societies, but also the human condition. Bridging histories of science and medicine with anthropologies of technology and the arts, the book will appeal to students and scholars of Korean and East Asian studies, as well as those with interests in the comparative history of medicine, STS, society and technology studies, art history, media studies, transnationalism, diaspora, and postcolonialism.
