Soviet Politics 1917 1991:

Soviet Politics 1917-1991 Mary McAuley, 1992 In the space of mere months in 1991 the Soviet Union saw an attempted coup fail Gorbachev leave office the Baltic states acquire independence Leningrad vote to rename itself St Petersburg the Communist Party disband and the Russian flag fly over the Kremlin One of the world's great powers a country of some 200 nationalities stretching across a dozen time zones had simply disintegrated ending an epoch in world history Now for the first time we are able to look back and assess the complete 75 year experiment with communism Based on extensive research and a first hand knowledge of the Soviet system *Soviet Politics 1917 1991* offers an authoritative and lively history of the entire spectrum of Soviet politics from the October Revolution and the rise of Lenin to the emergence of the Commonwealth of Independent States McAuley ranges from the Revolution to the unprecedented crash industrialization and social mobility to dictatorship and mass terror under Stalin to conservative state control under Krushchev Kosygin and Brezhnev and finally to the swift collapse of the state The author offers a particularly stimulating analysis of the developments that brought an end to communist party rule and the breakup of the Soviet Union She describes for instance how the 1989 elections undermined the Communist Party's assumption of unqualified popular support Yeltsin the bete noire of the Moscow party was swept in and Soloviev a deputy member of the Politburo who ran unopposed in Leningrad failed to garner 50% of the vote She shows how the Congress of that year televised nationally revealed to a wrapt nation a Party no longer solidly united behind one stand where deputies openly criticized the government the KGB and the Afghan war And she paints a striking portrait of Gorbachev trying to reconcile irreconcilable interests to heal the rift between Democrats and Party conservatives as the center began to unravel By the end of 1991 the USSR was gone forever with momentous and unpredictable consequences not only for the peoples of the former Soviet Union but for the world as a whole *Soviet Politics* helps readers make sense of the developments since 1985 showing how and why the system fell apart It will interest anyone wanting a full understanding of current world events

Velikanova, 2013-01-28 This is the first study of popular opinions in Soviet society in the 1920s These voices which made the Russian revolution characterize reactions to mobilization politics patriotic militarizing campaigns the tenth anniversary of the revolution and state attempts to unite the nation around a new Soviet identity

Freedom's Ordeal Peter Juviler, 2010-11-24 Fifteen countries have emerged from the collapse of the Soviet Union Freedom s Ordeal recounts the struggles of these newly independent nations to achieve freedom and to establish support for fundamental human rights Although history has shown that states emerging from collapsed empires rarely achieve full democracy in their first try Peter Juviler analyzes these successor states as crucial and not always unpromising tests of democracy s viability in postcommunist countries Taking into account the particularly difficult legacies of Soviet communism Freedom s Ordeal is distinguished by its careful tracing of the historical background with special attention to human rights before during and after communism Juviler suggests that the culture and practices of despotism may wither wherever modernization conflicts with tyranny and with the curtailment or denial of democratic rights and freedoms

World Economic Historical Statistics Carlos Sabillon, 2005 Since the earliest of times human beings have endeavored to uncover the causes of prosperity History is the best tool that society possesses for identifying and analyzing the factors that contribute to economic growth yet economic statistics that lend themselves to comparison are hard to come by Even academics who specialize in individual countries almost never present a set of statistics covering the whole 20th century and for the previous centuries the data is even more chaotic Here for the first time the economic statistics of the world are presented in a rationalized format that allows for an easy comparison across countries and through time Part One analyzes the most relevant ideas and theories that have been considered as causal

variables of economic growth It summarizes these ideas pedagogically and tests them against the historical data The results of such analyses are highly troubling because they reveal an absence of correlation between theory and reality Part Two presents a collection of statistics illustrating the development of the world economy during the last centuries The data was extracted from economic history and economic history books from the publications of the World Bank the Organization for Economic Cooperation and Development the International Monetary Fund the World Trade Organization the United Nations specialized agencies research institutes and country statistical publications and other books and journals Analyzing the data over geography and time Sabillon concludes that contrary to contemporary wisdom left to market forces alone the economy will not and does not flourish The factors that cause growth he says still need to be studied with a fresh eye This orderly and consistent presentation of statistics may be just the tool that helps future economic theorists to identify a reliable path to sustained growth This analysis of the long term historical development of the nations of the world is the culmination of a fourteen year research project funded in part by the Swiss National Fund for Scientific Research the Graduate Institute of International Studies in Geneva Switzerland and by the Geneva Business Institute Carlos Sabillon has an advanced degree from the Institute of International Studies Geneva Switzerland in Economic History His book *Manufacturing Technology and Economic Growth* was published by M E Sharpe Inc 2000

Cities After Socialism Gregory Andrusz, Michael Harloe, Ivan Szelenyi, 2011-08-10 *Cities After Socialism* is the first substantial and authoritative analysis of the role of cities in the transition to capitalism that is occurring in the former communist states of Eastern Europe and the Soviet Union It will be of equal value to urban specialists and to those who have a more general interest in the most dramatic socio political event of the contemporary era the collapse of state socialism Written by an international group of leading experts in the field *Cities after socialism* asks and answers some crucial questions about the nature of the emergent post socialist urban system and the conflicts and inequalities which are being generated by the processes of change now occurring

Not by Bread Alone Robert Nalbandov, 2016 Since its independence in 1991 Russia has struggled with the growing pains of defining its role in international politics After Vladimir Putin ascended to power in 2000 the country undertook grandiose foreign policy projects in an attempt to delineate its place among the world's superpowers With this in mind Robert Nalbandov examines the milestones of Russia's international relations since the turn of the twenty first century He focuses on the specific goals engagement practices and tools used by Putin's administration to promote Russia's vital national and strategic interests in specific geographic locations His findings illuminate Putin's foreign policy objective of reinstituting Russian global strategic dominance Nalbandov argues that identity based politics have dominated Putin's tenure and that Russia's east west split is reflected in Asian European politics Nalbandov's analysis shows that unchecked domestic power an almost exclusive application of hard power and determined ambition for unabridged global influence and a defined place as a world superpower are the keys to Putin's Russia
