### The smart house of the future

Today we look at the future of our homes. What exactly is a smart house of the future?

From the outside, a smart home isn't very different from today's homes. It can be a luxurious flat in the city centre, a cottage far away in the country or a detached house on the edge of town. The real difference is that a home like this is eco-friendly. The materials used for the house can keep it warm in winter and cool in the summer without using too much energy. And the energy itself comes from different sources, like solar panels on the roof or even from the rubbish in a special bin behind the house.

Let's walk inside the house. There are a lot of electronic sensors which can turn on and off different functions. You can turn on the lights or set the temperature without touching anything. All you have to do is use your voice. Say what you need and the house can do it. If you're away from home, you can also do the same thing using your mobile phone which connects to your house.

But the amazing thing is that the smart home can remember what you like. It checks your fridge and orders the food which you've already eaten. It wakes you up when you need to get up on different days of the week or even tell you about your friends coming for dinner this evening.

Now, would you like to find out more about the devices in a smart house? Follow the link below.

Cześć Robert!

Właśnie przeczytałem bardzo ciekawy artykuł o inteligentnych domach przyszłości. Taki dom może z zewnątrz nie różnić się od zwykłego domu. Może to być równie wiejska chata z dala od miasta jak i eleganckie (1) \_\_\_\_\_ w centrum miasta. Wokół domu lub na nim znajdą się ekologiczne urządzenia wytwarzające energię, np. z odpadów w specjalnym pojemniku znajdującym się (2) \_\_\_\_\_.

Wnętrze domu będzie pełne czujników, tak aby można było włączyć i wyłączyć różne funkcje, np. ustawić temperaturę używając głosu lub (3) \_\_\_\_\_, kiedy jesteśmy poza domem.

Inteligentne domy przyszłości będą zapamiętywać nasze preferencje. Mogą sprawdzić, czego brakuje w (4) \_\_\_\_\_, obudzić nas o konkretnej porze w zależności od dnia tygodnia, czy też przypomnieć nam o wizycie przyjaciół.

Mam zamiar również poczytać o konkretnych urządzeniach, w jakie będzie wyposażony inteligentny dom. Może znajdę czas dziś wieczorem.
