Revamping Architectural Education Rajesh

Sharma, 2018-06-08 The book that you hold in your hands is a treasure trove of ideas to set into motion a new generation of learning for architects As the author is a practitioner of this technology called architecture he have often felt that globally it is the last field of knowledge that still displays vestiges of a holistic renaissance attitude of mind It has not fallen victim to our global love for economic development above all other considerations and is not always a handmaiden of consumerist culture Architects are somewhat obsessed with form Despite this or inspite of it the combine and harmonize the field of applied arts with the sciences the attitudes of engineering optimization with the expression of the visual arts covering subjects as diverse as chemistry and history India is possibly the world s largest future market for private sector architects today If we do not adapt our archiectural practice starting with our architectural teaching practices we run the clear and present danger of becoming extinct in the race for economic development and urbanization which is truly sustainable resilient sufficient and equitable In reading this little gem of a book the author would urge the reader to look beyond formulae and descriptions and generatean agenda for reform beyond just the curriculum and towards transformation As Indian society struggles to understand its architects the profession owes a duty to itself to remain relevant to social needs and aspirations to create a nation of our dreams And the author hopes that the beginning of that agenda can befound in the pages of this book interpreted by every reader individually

Spirituality in Architectural Education Julio Bermudez, 2021-10-15 How does spirituality enter the education of an architect Should it What do we mean by spirituality in the first place Isn't architectural education a training ground for professional practice and therefore technically and secularly oriented Is there even room to add something as esoteric if not controversial as spirituality to an already packed university curriculum The humanistic and artistic roots of architecture certainly invite us to consider dimensions well beyond the instrumental including spirituality But how would we teach such a thing And why if spirituality is indeed relevant to learning architecture have we heard so little about it Spirituality in Architectural Education addresses these and many other important philosophical disciplinary pedagogic and practical questions Grounded on the twelve year old Walton Critic Program at the Catholic University of America School of Architecture and Planning this book offers solid arguments and insightful reflections on the role that big questions and spiritual sensibility ought to play in the architectural academy today Using 11 design studios as stopping grounds the volume takes the reader into a journey full of meaningful interrogations pedagogic techniques challenging realizations and beautiful designs Essays from renowned architects Craig W Hartman Juhani Pallasmaa Alberto Campo Baeza Claudio Silvestrin Eliana B rmdida Michael J Crosbie Prem Chandavarkar Rick Joy Susan Jones and Daniel Libeskind open new vistas on the impact of spirituality in architectural education and practice All this work is contextualized within the ongoing discussion of the role of spirituality and religion in higher education at large The result is an unprecedented volume that starts a long awaited conversation that will advance architectural schooling ACSA Distinguished Professor Julio Bermudez with recognized expertise on spirituality in architecture will be the guide in this fascinating and contemplative journey
