changing social and political contexts It is organised into three main sections 1 Place Space and Mobility sites of mobilization and regulation 2 Scale and Territory structuring collective interests identities and resources and 3 Networks connecting actors and resources across space It concludes by suggesting that different spatialities place scale networks interlink within one another in particular instances of collective action playing distinctive yet complementary roles in shaping how these actions unfold in the political arena By mapping state of the art conceptual and empirical terrain across Geography Sociology and Political Science Spaces of Contention provides readers with a much needed guide to innovative research on the spatial constitution of social movements and how social movements tactically and strategically approach and produce space The Wiley-Blackwell Companion to Cultural Geography Nuala C. A Companion To Marx's Capital, Volume 2 David Harvey, 2013-09-10 The biggest financial crisis since the Great Depression shows no sign of coming to a close and Marx's work remains key in understanding the cycles that lead to recession For nearly forty years David Harvey has written and lectured on Capital becoming one of the world's most foremost Marx scholars Based on his recent lectures and following the success of his companion to the first volume of Capital Harvey turns his attention to Volume 2 aiming to bring his depth of learning to a broader audience guiding first time readers through a fascinating and hitherto neglected text Whereas Volume 1 focuses on production Volume 2 looks at how the circuits of capital the buying and selling of goods realize value This is a must read for everyone concerned to acquire a fuller understanding of Marx's political economy Amman: Gulf Capital, Identity, and Contemporary Megaprojects Majd Musa, 2017-01-20 Gulf capital flows to Amman Jordan in the early twenty first century and the investment of this capital in large scale urban developments have significantly transformed the city's built environment Therefore to understand urban transformation in Amman during this period it is important to analyze it against the backdrop of Gulf capital and its integration into Jordan's economy and the integration of both the country's economy and Gulf capital into the global capitalist economy This book analyzes three cases of megaprojects planned for the city in the early twenty first century The New Downtown Abdali Jordan Gate and Sanaya Amman Drawing upon theories on urban development and capitalism identity

and discourse and urban development processes and cases in other cities the book investigates how contemporary megaprojects in Amman fit into the capitalist economy and its modes of production how capital flows construct a modern image of the city and how the new image and megaprojects represent the city residents as modern and create Amman as a global city This book presents a new approach to the study of the urban built environment in Amman providing a valuable interdisciplinary contribution to the scholarly work on globalizing cities especially in the Middle East Grounding Globalization Edward Webster, Rob Lambert, Andries Beziudenhout, 2011-08-02 Winner of the 2009 Distinguished Scholarly Monograph Prize awarded by the American Sociological Association Labor and Labor Movements section Claims have been made on the emergence of a new labour internationalism in response to the growing insecurity created by globalization However when persons face conditions of insecurity they often turn inwards The book contains a warning and a sign of hope Some workers become fatalistic even xenophobic Others are attempting to globalize their own struggles Examines the claim that a new labour internationalism is emerging by grounding the book in evidence rather than assertion Analyzes three distinct places Orange Australia Changwon South Korea and Ezakheni South Africa and how they dealt with manufacturing plants undergoing restructuring Explores worker responses to rising levels of insecurity and examines preconditions for the emergence of counter movements to such insecurities Highlights the significance of place and scale and demonstrates how the restructuring of multi national corporations and worker responses to this connect the two concepts **Resistance, Space and Political Identities** David Featherstone, 2008-09-22 Utilizing research on networked struggles in both the 18th century Atlantic world and our modern day Resistance Space and Political Identities The Making of Counter Global Networks challenges existing understandings of the relations between space politics and resistance to develop an innovative account of networked forms of resistance and political activity Explores counter global struggles in both the past and present including both the 18th century Atlantic world and contemporary forms of resistance Examines the productive geographies of contestation Foregrounds the solidarities and geographies of connection between different place based struggles and argues that such solidarities are essential to produce more plural forms of globalization
