Spatiality Sovereignty And Carl Schmitt Geographies Of The Nomos Interventions:

Spatiality, Sovereignty and Carl Schmitt Stephen Legg, 2011-05-17 The writings of Carl Schmitt are now indissociable from both an historical period and a contemporary moment. He will forever be remembered for his association with the National Socialists of 1930s Germany and as the figure whose writings on sovereignty, politics and the law provided justification for authoritarian decisional states. Yet at the same time the post September 11th 2001 world is one in which a wide range of scholars have increasingly turned to Schmitt to understand a world of with us or against us. Manichaeism, spaces of exception which seem to be placed outside the law by legal mechanisms themselves and the contestation of a uni-polar post 1989 world. This attention marks out Schmitt as one of the foremost emerging theorists in critical theory and assures his work a large and growing audience. This work brings together geographers and Schmitt experts who are attuned to the spatial dimensions of his work to discuss his 1950 work *The Nomos of the Earth in the International Law of the Jus Publicum Europaeum*. Explaining the growing audience for Schmitt's work, a broad range of contributors also examine the Nomos in relation to broader debates about enmity and war, the production of space, the work of Michel Foucault and Giorgio Agamben and the recuperability of such an intellect tainted by its anti-Semitism and links to the Nazi party. This work will be of great interest to researchers in political theory, socio-legal studies, geopolitics and critical IR theory. **Spatiality, Sovereignty and Carl Schmitt** Stephen Legg, 2011-05-17 The aim of this book is to bring together geographers and Schmitt experts who are attuned to the spatial dimensions of his work to discuss *The Nomos of the Earth in the International Law of the Jus Publicum Europaeum* Schmitt 1950 2003. **Targeted Killing** Markus Gunneflo, 2016-05-12 Looking beyond the events of the second intifada and 9/11, this book reveals how targeted killing is intimately embedded in both Israeli and US statecraft and in the problematic relationship between sovereign authority and lawful violence underpinning the modern state system. It details the legal and political issues raised in targeted killing as it has emerged in practice, including questions of domestic constitutional authority, the use of force in international law, the law of belligerent occupation, the law of targeting and human rights law. The distinctive nature of Israeli and US targeted killing is analysed in terms of the compulsion of legality characteristic of the liberal constitutional state, a compulsion that demands the ability to distinguish between legal targeted killing and extra-legal political assassination. The effect is a highly legalized framework for the extraterritorial killing of designated terrorists that may significantly affect the international law of force. *Spatial Justice After Apartheid* Jaco Barnard-Naudé, Julia Chrystostalis, 2022-08-25 This book considers the question of spatial justice after apartheid from several disciplinary perspectives: jurisprudence, law, literature, architecture, photography and psychoanalysis are just some of the disciplines engaged here. However, the main theoretical device on which the authors comment is the legacy of what, in Carl Schmitt's terms, is *nomos* as the spatialised normativity of sociality. Each author considers, within the practical and theoretical constraints of their topic, the question of what *nomos* in its modern configuration may or may not contribute to a thinking of

spatial justice after apartheid On the whole the collection forces a confrontation between law's spatiality in a postcolonial era on the one hand and the traumatic legacy of what Paul Gilroy has called the colonial nomos on the other hand In the course of this confrontation critical questions of continuation extension disruption and rewriting are raised and confronted in novel and innovative ways that both challenge Schmitt's account of nomos and affirm the centrality of the constitutive relation between law and space The book promises to resituate the trajectory of nomos while considering critical instances through which the spatial legacy of apartheid might at last be overcome This interdisciplinary book will appeal to scholars of critical legal theory political philosophy aesthetics and architecture

Politics and the Art of Commemoration Katherine Hite, 2013-06-17 Memorials are proliferating throughout the globe States recognize the political value of memorials memorials can convey national unity a sense of overcoming violent legacies a commitment to political stability or the strengthening of democracy Memorials represent fitful negotiations between states and societies symbolically to right wrongs to recognize loss to assert distinct historical narratives that are not dominant This book explores relationships among art representation and politics through memorials to violent pasts in Spain and Latin America Drawing from curators art historians psychologists political theorists holocaust studies scholars as well as the voices of artists activists and families of murdered and disappeared loved ones **Politics and the Art of Commemoration** uses memorials as conceptual lenses into deep politics of conflict and as suggestive arenas for imagining democratic praxis Tracing deep histories of political struggle and suggesting that today's commemorative practices are innovating powerful forms of collective political action this work will be of great interest to students and scholars of international relations Latin American studies and memory studies

Politics of Urbanism Warren Magnusson, 2013-07-03 The central argument of this book is that we need to abandon our state-centric approach to political understanding and learn to see like a city if we are to make sense of contemporary politics

Geo-Political Spaces Patricia Chiantera-Stutte, Ulrike Jureit, 2025-11-27 This book focuses on the geographical and geopolitical sources for Carl Schmitt's multilayered political thinking in order to uncover the relation between the political and the geographical aspects of his concept of space from 1939 to 1950 The aim is therefore to open up a field of enquiry specifically to investigate Schmitt's sources in the geographical and geopolitical literature inside and outside Germany in order to reconstruct the genealogy of his idea of space territory and international order In doing so the contributors aim both to distinguish concepts that have generally been only vaguely defined in the literature on Schmitt namely his idea of space political territory and land and to define more precisely the relationship between Schmitt's *Gro raum* and the National Socialist *Lebensraum* This book refers to complements and goes beyond three different approaches International Relations geography and philology First in that it explores the genealogy of Schmitt's concept of space by adopting a twofold methodology of intellectual history and philology second in that it considers the relevance of language in Schmitt's discourse on power and space third in that it relates Schmitt's thinking to the transnational literature on geopolitics and political

geography Geo Political Spaces will appeal to academics and the well informed public at large It is also suitable for academic teaching especially when it comes to historical theory the concept of space or the history of political thought **The Citizen in the 21st Century** James Arvanitakis, Ingrid Mattherws, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 In the nineteen essays of this collection the 21st century citizen is introduced deconstructed probed and admired among the messy realities of the contemporary world As an inter disciplinary project the collection draws on expertise from across Europe North America and Australasia to offer new insights into such diverse existences as the environmental citizen the young citizen the multiple citizen the non citizen and the global citizen It unflinchingly spotlights the failures of our contemporary societies to resolve the endless universal problems of conflict poverty and oppression It also opens windows of hope onto a range of new understandings and innovative approaches to the challenges we face from the mass movements of refugees to the digitalisation of social contact This material can be read as a whole as a conceptual collection or it can be dipped in to and out of between work and leisure Whether it is read as research or pastime this volume will challenge and confront comfort and renew the many ways of thinking about citizenship in the 21st century *The Mysterious and Obvious in American Diplomacy* Insur Farkhutdinov, 2020-07-09 The book analyses the origins of the idea of interference in the internal affairs of other states and preventive strike in international law beginning with the Monroe Doctrine 1823 American diplomacy has not changed in principle in the last two centuries and is still based on the Monroe doctrine This is proven here through the study of the foreign policy of the vast majority of US presidents from Monroe to Trump As the book shows one of the main tools of American domination throughout the world in the second half of the 20th century and the beginning of the 21st is the doctrine of the preventive strike and interference in the affairs of other states

Rethinking Hizballah Samer N. Abboud, Benjamin J. Muller, 2016-04-08 International Relations scholarship posits that legitimacy authority and violence are attributes of states However groups like Hizballah clearly challenge this framing of global politics through its continued ability to exercise violence in the regional arena Surveying the different and sometimes conflicting interpretations of state society relations in Lebanon this book presents a lucid examination of the socio political conditions that gave rise to the Lebanese movement Hizballah from 1982 until the present Framing and analysing Hizballah through the perspective of the resistance society an articulation of identity politics that informs the violent and non violent political strategies of the movement Abboud and Muller demonstrate how Hizballah poses a challenge to the Lebanese state through its acquisition and exercise of private authority and the implications this has for other Lebanese political actors An essential insight into the complexities of the workings of Hizballah this book broadens our understanding of how legitimacy authority and violence can be acquired and exercised outside the structure of the sovereign nation state An invaluable resource for scholars working in the fields of Critical Comparative Politics and International Relations
