Species With Amnesia Our Forgotten History:

Species with Amnesia Robert Sepehr, 2015-05-28 Highly advanced civilizations have been here before us just to be destroyed by some great global catastrophe But for each race that has died out another has taken its place with a selected few holding on to the memories and sacred knowledge of the past race In our vanity we think we have discovered some of the great truths of science and technology but we are in fact only just beginning to rediscover the profound wisdom of past civilizations In many ways we are like an awakening Species with Amnesia yearning to reclaim our forgotten past

Forgotten Foods: The Ingredients We Erased from History Mark E. Jemy,2025-10-15 Forgotten Foods is a historical and culinary exploration of ingredients that were once staples of civilizations but have been lost to time The book takes the reader on a journey to uncover the ghost in the grocery aisle rediscovering lost flavors from ancient umami sources like garum to forgotten grains fruits roots and spices It s not just a history of what people ate but an investigation into why these foods disappeared and a celebration of the curious cooks and forgotten farmers who kept their stories alive The book promises to inspire readers to look at their own kitchens with a new sense of wonder seeing their meals as a conversation with the past

Ancient Gods Jim Willis,2017-02-14 Where do we come from What are the origins of modern civilization Do the world s pyramids the Nazca Lines Easter Island statues and other enigmatic structures archeological wonders and geographic anomalies contain evidence of ancient gods Sifting through the historical and archaeological evidence Ancient Gods Lost Histories Hidden Truths and the Conspiracy of Silence by ordained minister Jim Willis probes the myths stories history and facts of ancient civilizations lost technologies past catastrophes archetypical astronauts and bygone religions to tease out the truth of our distant past and modern existence It takes and in depth look at the facts fictions and controversies of our ancestors origins who we are as a people and who might have come before us Ancient Gods tackles more than 60 nagging stories of ancient gods ancestors alien visitors theories and explanations such as 40 000 years ago why did our ancestors across Europe and Asia crawl deep underground sometimes as much as a mile to paint magnificent images on the walls of caves How did the megalithic temple site called G bekli Tepe come to be built 11 600 years before the agricultural revolution and before humans learned how to grow their own food How were massive stones weighing up to four tons dragged 140 miles across England to build Stonehenge Who and why were pyramids built on the equatorial band circling the earth What does modern DNA analysis tell us of mankind s heritage Are we to believe the Ancient Alien Theory Along the way Willis examines human history and searches for the sparks of contemporary society It also includes a helpful bibliography and an extensive index adding to its usefulness

Arrogance of The Species George Simonis,2011 *Wake up!!! Isles of Amnesia Mark J. Rauzon,2016-01-31 For over a quarter century biologist Mark J Rauzon worked in the field of

island restoration traveling throughout the American Insular Pacific to eradicate invasive plants and animals introduced by humans The region spans from Hawai i to Samoa to Guam and their neighbors small obscure tropical islands that are hundreds if not thousands of nautical miles from each other These little known US possessions and territories include various islands and atolls Jarvis Howland Baker the Northern Marianas Wake Palmyra Johnston and Rose Atoll among others They anchor a vast National Marine Monument program created in 2009 and expanded in 2014 to protect the largest area in the world from exploitation In Isles of Amnesia Rauzon chronicles the ecological and human history of these islands enlivened with his first hand experiences of eradication efforts to restore atoll ecosystems and maximize native biodiversity Each chapter focuses on an individual island or island group revealing how each location has its own particular story secret past or ecological lesson to be shared Taken as a whole the region has played a unique role in American history with the remoteness of the islands having served the needs of whalers and guano miners in the 1800s and in later years that of military secret projects missile launching chemical weapon incinerations and air bases Rauzon further explores the creation of the National Marine Monuments and what their protection means to a changing ocean and presents original research about the US military s Pacific Project and germ warfare testing Illustrated with over seventy historical photographs and original drawings this much needed work tells the fascinating story of America s forgotten Pacific islands Ithihaasa Bhaktivejanyana Swami,2013-01-29 Dr Singh Science says that the different species were not created simultaneously but evolved gradually I came across a statement in the Bhagavad Gita to the effect that all 8 400 000 species of living entities are created simultaneously Is that correct Srila Prabhupada Yes Living beings move from one bodily form to another The forms already exist The living entity simply transfers himself just as a man transfers himself from one apartment to another One apartment is first class another is second class and another is third class Suppose a person comes from a lower class apartment to a first class apartment the person is the same but now according to his capacity for payment or karma he is able to occupy a higher class apartment Real evolution does not mean physical development but the development of Consciousness Do you follow The apartment already exists however it is not the lower class apartment that becomes the higher class apartment That is Darwins nonsensical theory He would say that the apartment has become high class Modern scientists think that life has come from matter They say that millions and millions of years ago there was simply matter but no life We do not accept that Of the two energies life and matter life or spirit is the original superior energy and matter is the resultant inferior energy Spirit is independent and matter is dependent Dr Singh All that you have been saying completely contradicts Darwins theory of evolution Srila Prabhupada Darwin and his followers are rascals If originally there were no higher species why do they exist now Also why do the lower species still exist For example at the present moment we see both the intellectual person and the foolish ass Why do both these entities exist simultaneously Why hasnt the ass form evolved upwards and disappeared Why do we never see a monkey giving birth to a human In Bhagavad Gita the word yantra or machine means that in any

species of life we are traveling in bodies that are like machines provided by material nature
