Lord Willing? Jessica Kelley, 2016-05-03. Does God's perfect plan really include this? When her young son was diagnosed with brain cancer, Jessica Kelley couldn't stomach Christian clichés: God's will, Divine design, The Lord's perfect plan. In *Lord Willing*, Kelley boldly tackles one of the most difficult questions of the Christian life: if God is all powerful and all loving, why do we suffer? For Kelley, this question takes an even more painful and personal turn: did God lack the power or the desire to spare her four-year-old son? For those dissatisfied with easy answers to why evil and tragedy occur, *Lord Willing* offers a refreshing, hopeful journey straight to the heart of God. Be prepared for something more beautiful, more pure, and more healing than you can dare to imagine.

Vibrant and Healthy Kids National

Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach, 2019-12-27 Children are the foundation of the United States and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science Practice and Policy to Advance Health Equity builds upon and updates research from Communities in Action Pathways to Health Equity 2017 and From Neurons to Neighborhoods: The Science of Early Childhood Development 2000. This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.
