Productivity Guide Global Trend:

Global Trends in Agricultural Demand, Productivity, and Supply, 1978-1986 Mary E. Lassanyi, 1987 Brands as Productive Assets: Concepts, Measurement, and Global Trends World Intellectual Property Organization, Carol A. Corrado, Janet X. Hao, 2014 The paper looks at brands from an economic point of view It defines concepts analyzes the conditions under which brands are long lived productive assets and contribute to economic growth and reviews the measurement of investment in brands It finds that a productive role for brands is consistent with assumptions used in the economic analysis of innovation Finally it offers an analysis of economic development that suggests branding rises with growth

The SDGs and food system challenges: Global trends and scenarios toward 2030, 2024-02-12 Progress toward reducing global hunger has stalled since the mid 2010s In fact hunger is on the rise again driven by slowing economic growth and protracted conflict intensified by the impacts of climate change and economic shocks in many low and middle income countries In addition food systems worldwide have suffered disruptions in recent years caused by the COVID 19 related global recession and associated supply chain disruptions and exacerbated by the war in Ukraine These factors have also jeopardized efforts at addressing the challenges to food system sustainability The 2030 Agenda for Sustainable Development and the related sustainable development goals SDGs defined in 2015 recognize these challenges and set ambitious targets to end hunger and all forms of malnutrition and to make agriculture and food systems sustainable by 2030 Many other fora have restated and reiterated these ambitions including the 2021 United Nations Food System Summit UNFSS While governments around the world have subscribed to these ambitions collectively they have not been very specific as to how to achieve the SDGs and related goals and targets except for three means of implementation MOI involving i increases in research and development ii reductions in trade distortions and iii improved functioning and reduced volatility in food markets This paper is part of a wider effort at assessing the international community s follow through on the above ambitions and the related implicit or explicit commitments made toward action for achieving them While not presenting new research findings we bring together available evidence and scenario analyses to assess the progress made toward the ambitions for transforming food systems the actions taken in regard of the internationally concerted agenda and the potential for accelerating progress The number of hungry people in the world has risen from 564 million in 2015 when the SDGs were agreed to 735 million in 2022 While declines to between 570 and 590 million by 2030 are projected this is far above the 470 million projected in the absence of the COVID 19 pandemic and the Ukraine war The share of the world s people unable to afford healthy diets is projected to decline from 42 percent in 2021 to a still far too high 36 percent by 2030 On the means of implementation levels of spending on agricultural research and development have increased particularly in key developing countries such as Brazil China and India However rates of investment remain too low for comfort particularly in low income countries Also little progress has been made in reducing agricultural trade distortions and many countries continue to use

trade policy measures such as export restrictions which have proven to increase the volatility of both world and domestic food prices We conclude that progress toward the SDG 2 targets has been dismal and that the food system challenges have only become bigger But we also find that it is not too late to accelerate progress and that the desired food system transformation can still be achieved over a reasonable timespan and at manageable incremental cost Doing so will require unprecedented concerted and coherent action on multiple fronts which may prove the biggest obstacle of all **Global Trends 2025**

National Intelligence Council,2010-03-01 From the Muslimization of Western Europe to the impact of HIV AIDS around the planet from the trials of the coming post petroleum world to the tactical implications of an ice free Arctic the nations of Earth are facing more radical change than ever before in the first quarter of the 21st century This important government report from the United States NATIONAL INTELLIGENCE COUNCIL which has been producing assessments of national security issues for senior U S policy makers since 1979 casts a strategic eye at the near future and examines those factors and trends that will most dramatically shape it the rapidly globalizing economy the growing global middle class the challenges of aging populations migration urbanization and ethnic shifts the rising heavyweights India and China the geopolitics of energy water food and climate change the risk of a nuclear arms race in the Middle East terrorism power sharing in a multipolar world and more Students of political trends forward looking entrepreneurs and anyone eager for a glimpse into the next decades will find this essential reading **Handbook of Research on Critical Issues and Global Trends in International Education**
