American Cities in Post-Apocalyptic Science Fiction Robert Yeates, 2021-11-15 Visions of the American city in post apocalyptic ruin permeate literary and popular fiction across print visual audio and digital media American Cities in Post Apocalyptic Science Fiction explores the prevalence of these representations in American culture drawing from a wide range of primary and critical works from the early twentieth century to today Beginning with science fiction in literary magazines before taking in radio dramas film video games and expansive transmedia franchises Robert Yeates argues that post apocalyptic representations of the American city are uniquely suited for explorations of contemporary urban issues Examining how the post apocalyptic American city has been

repeatedly adapted and repurposed to new and developing media over the last century this book reveals that the content and form of such texts work together to create vivid and immersive fictional spaces in ways that would otherwise not be possible Chapters present media specific analyses of these texts situating them within their historical contexts and the broader history of representations of urban ruins in American fiction Original in its scope and cross media approach *American Cities in Post Apocalyptic Science Fiction* both illuminates little studied texts and provides provocative new readings of familiar works such as *Blade Runner* and *The Walking Dead* placing them within the larger historical context of imaginings of the American city in ruins *Cyberpunk in a Transnational Context* Takayuki Tatsumi, 2019-08-20 Mike Mosher's *Some Aspects of Californian Cyberpunk* vividly reminds us of the influence of West Coast counterculture on cyberpunks with special emphasis on 1960s theoretical gurus such as Timothy Leary and Marshall McLuhan who explored the frontiers of inner space as well as the global village Frenchy Lunning's *Cyberpunk Redux* dives in the rich sight of Post Anthropocentric Visuality examines how the heritage of Ridley Scott's techno noir film *Blade Runner* 1982 that preceded Gibson's *Neuromancer* 1984 keeps revolutionizing the art of visuality even in the age of the Anthropocene If you read Lunning's essay along with Lidia Meras's *European Cyberpunk Cinema* which closely analyzes major European cyberpunkish dystopian films *Renaissance* 2006 and *Metropia* 2009 and Elana Gomel's *Recycled Dystopias Cyberpunk and the End of History* your understanding of the cinematic and post utopian possibility of cyberpunk will become more comprehensive For a cutting edge critique of cyberpunk manga let me recommend Martin de la Iglesia's *Has Akira Always Been a Cyberpunk Comic* which radically redefines the status of *Akira* 1982 1993 as trans generic paying attention to the genre consciousness of the contemporary readers of its Euro American editions Next Denis Taillandier's *New Spaces for Old Motifs The Virtual Worlds of Japanese Cyberpunk* interprets the significance of Japanese hardcore cyberpunk novels such as Goro Masaki's *Venus City* 1995 and Hirotaka Tobi's *Grandes Vacances* 2002 translated as *The Thousand Year Beach* 2018 and *Ragged Girl* 2006 paying special attention to how the authors created their virtual landscape in a Japanese way For a full discussion of William Gibson's works please read Janine Tobek and Donald Jellerson's *Caring About the Past Present and Future in William Gibson's Pattern Recognition and Guerilla Games Horizon Zero Dawn* along with my own *Transpacific Cyberpunk Transgeneric Interactions between Prose Cinema and Manga* The former reconsiders the first novel of Gibson's new trilogy in the 21st century not as realistic but as participatory whereas the latter relocates Gibson's essence not in cyberspace but in a junkyard making the most of his post Dada Surrealistic aesthetics and Lo Tek way of life as is clear in the 1990s *Bridge* trilogy **Hype** Jon Helgason, Sara Kärrholm, Ann Steiner, 2015-01-01 In the world of books and literature hype is associated with bestsellerism the books that sell the most are read by vast numbers and constantly talked about in media and staff rooms Often it is the success in itself that generates an interest because popularity begets popularity Quite often though a hyped bestseller is met with a skeptic criticism of poor language a badly constructed plot a predictable story line or all three The bestseller

phenomenon is sometimes conceived as a threat against real literature Research into the creation reception and meaning of bestsellers is utterly scarce and Hype Bestsellers and Literary Culture is an important contribution to the understanding of the literature read by the masses Popular literature plays an important role in the lives of millions of readers offering entertainment social commentary and alternate perspectives on everyday life This volume brings together such diverse issues as the creation of hype the role and the meaning of the author in the present day media landscape changes in the book trade and the relationship between bestsellers and research into them Further articles give an historical overview on postapocalyptic stories desert romances and the role of the authors This book offers new knowledge on a subject that is increasingly popular within university curricula Although the anthology is a work of academic research the texts are of equal interest to general readers

Desiring the Bomb Calum Lister Matheson, 2018-11-13 A timely interdisciplinary study that applies psychoanalysis and the rhetorical tradition of the sublime to examine the cultural aftermath of the Atomic Age Every culture throughout history has obsessed over various end of the world scenarios The dawn of the Atomic Age marked a new twist in this tale For the first time our species became aware of its capacity to deliberately destroy itself Since that time the Bomb has served as an organizing metaphor a symbol of human annihilation a stand in for the unspeakable void of extinction and a discursive construct that challenges the limits of communication itself The parallel fascination with and abhorrence of nuclear weapons has metastasized into a host of other end of the world scenarios from global pandemics and climate change to zombie uprisings and asteroid collisions Desiring the Bomb Communication Psychoanalysis and the Atomic Age explores these world ending fantasies through the lens of psychoanalysis to reveal their implications for both contemporary apocalyptic culture and the operations of language itself What accounts for the enduring power of the Bomb as a symbol What does the prospect of annihilation suggest about language and its limits Thoroughly researched and accessibly written this study expands on the theories of Kenneth Burke Jacques Lacan Sigmund Freud and many others from a variety of disciplines to arrive at some answers to these questions Calum L Matheson undertakes a series of case studies including the Trinity test site nuclear war games urban shelter schemes and contemporary survivalism and argues that contending with the anxieties individual social cultural and political born of the Atomic Age depends on rhetorical conceptions of the real an order of experience that cannot be easily negotiated in language Using aspects of media studies rhetorical theory and psychoanalysis the author deftly engages the topics of Atomic Age survival extinction religion and fantasy along with their enduring cultural legacies to develop an account of the Bomb as a signifier and to explore why some Americans have become fascinated with fantasies of nuclear warfare and narratives of postapocalyptic rebirth

Transmedia Storytelling and the Apocalypse Stephen Joyce, 2018-08-21 This book confronts the question of why our culture is so fascinated by the apocalypse It ultimately argues that while many see the post apocalyptic genre as reflective of contemporary fears it has actually co evolved with the transformations in our mediascape to become a perfect vehicle for transmedia storytelling The post

apocalyptic offers audiences a portal to a fantasy world that is at once strange and familiar offers a high degree of internal consistency and completeness and allows for a diversity of stories by different creative teams in the same story world With case studies of franchises such as The Walking Dead and The Terminator Transmedia Storytelling and the Apocalypse offers analyses of how shifts in media industries and reception cultures have promoted a new kind of open world building narrative across film television video games and print For transmedia scholars and fans of the genre this book shows how the end of the world is really just the beginning The American Imperial Gothic Johan Hoglund,2016-03-16 The imagination of the early twenty first century is catastrophic with Hollywood blockbusters novels computer games popular music art and even political speeches all depicting a world consumed by vampires zombies meteors aliens from outer space disease crazed terrorists and mad scientists These frequently gothic descriptions of the apocalypse not only commodify fear itself they articulate and even help produce imperialism Building on and often retelling the British imperial gothic of the late nineteenth century the American imperial gothic is obsessed with race gender degeneration and invasion with the destruction of society the collapse of modernity and the disintegration of capitalism Drawing on a rich array of texts from a long history of the gothic this book contends that the doom faced by the world in popular culture is related to the current global instability renegotiation of worldwide power and the American bid for hegemony that goes back to the beginning of the Republic and which have given shape to the first decade of the millennium From the frontier gothic of Charles Brockden Brown s Edgar Huntly to the apocalyptic torture porn of Eli Roth s Hostel the American imperial gothic dramatises the desires and anxieties of empire Revealing the ways in which images of destruction and social upheaval both query the violence with which the US has asserted itself locally and globally and feed the longing for stable imperial structures this book will be of interest to scholars and students of popular culture cultural and media studies literary and visual studies and sociology *Un-American Dreams* J. Jesse Ramírez,2022-04-15 After the end the world will be un American This speculation forms the nucleus of Un American Dreams a study of US apocalyptic science fiction and the cultural politics of disimagined community in the short century of American superpower 1945 2001 Between the atomic attacks on Hiroshima and Nagasaki which helped to transform the United States into a superpower and initiated the Cold War and the terrorist attacks on the World Trade Center and the Pentagon which spelled the Cold War s second death and inaugurated the War on Terror apocalyptic science fiction returned again and again to the scene of America s negation During the American Century to imagine yourself as American and as a participant in a shared national culture meant disimagining the most powerful nation on the planet Un American Dreams illuminates how George R Stewart Philip K Dick George A Romero Octavia Butler and Roland Emmerich represented the impossibility of reforming American society and used figures of the end of the world as speculative pretexts to imagine the utopian possibilities of an un American world The American Century was simultaneously a closure of the path to utopia and an escape route into apocalyptic science fiction the underground into which figures of an alternative future

could be smuggled **Futurescapes** Ralph Pordzik, 2009 This book testifies to the growing interest in the many spaces of utopia It intends to map out on utopian and science fiction discourses some of the new and revisionist models of spatial analysis applied in Literary and Cultural Studies in recent years The aim of the volume is to side step the established generic binary of utopia and dystopia or science fiction and thus to open the analysis of utopian literature to new lines of inquiry The essays collected here propose to think of utopias not so much as fictional texts about future change and transformation but as vital elements in a cultural process through which social spatial and subjective identities are formed Utopias can thus be read as textual systems implying a distinct spatial and temporal dimension as spatial practices that tend to naturalize a cultural and social construction that of the good life the radically improved welfare state the Christian paradise the counter society etc and make that representation operational by interpellating their readers in some determinate relation to their givenness as sites of political and individual improvement This volume is of interest for all scholars and students of literature who wish to explore the ways in which utopias of the past and recent present have circulated as media of cultural exchange and homogenization as sites of cultural and linguistic appropriation and as foci for the spatial formation of national and regional identities in the English speaking world *Evolution and Popular Narrative* , 2019-06-07 The contributors to this volume share the assumption that popular narrative when viewed with an evolutionary lens offers an incisive index into human nature In theory narrative art could take a near infinity of possible forms In actual practice however particular motifs plot patterns stereotypical figures and artistic devices persistently resurface indicating specific predilections frequently at odds with our actual living conditions Our studies explore various media and genres to gauge the impact of our evolutionary inheritance in interdependence with the respective cultural environments on our aesthetic appreciation As they suggest research into mass culture is not only indispensable for evolutionary criticism but may also contribute to our understanding of prehistoric selection pressures that still influence modern preferences in popular narrative Contributions by David Andrews James Carney Mathias Clasen Brett Cooke Tam s D vid Barrett Tom Dolack Kathryn Duncan Isabel Behncke Izquierdo Joe Keener Alex C Parrish Todd K Platts Anna Rotkirch Judith P Saunders Michelle Scalise Sugiyama Dirk Vanderbeke and Sophia Wege *Making Sense of Society* Alex Khasnabish, 2022-05-30T00:00:00Z Grounded in the sister disciplines of sociology and anthropology this textbook is an accessible and critical introduction to contemporary social research Alex Khasnabish eschews the common disciplinary silos in favour of an integrated approach to understanding and practising critical social research Situated in the North American context the text draws on cross cultural examples to give readers a clear sense of the diversity in human social relations It is organized thematically in a way that introduces readers to the core areas of social research and social organization and takes an unapologetically radical approach in identifying the relations of oppression and exploitation that give rise to what most corporate textbooks euphemistically identify as social problems Focusing on key dynamics and processes at the heart of so many contemporary issues and public conversations this

text highlights the ways in which critical social research can contribute to exploring understanding and forging alternatives to an increasingly bankrupt violent unstable and unjust status quo
