Climate Fiction: Ecological Dimensions Ananya Mukherjee, Tanmoy Baghira, 2025-06-15 Climate Fiction Ecological Dimensions offers an introspective gaze into intersections of literature film and ecology to recognise how fiction mediates the Anthropocene Employing postcolonial and intersectional lenses this volume will interrogate the historical legacies of colonialism that have intensified ecological degradation The contributors in this volume not only observe the Anthropocene as a narrative but also assess its literary conventions to highlight its inherently fictional framework that shape its representation in literature This volume will engage with the current developments in this field and will try to diversify various other issues

The Palgrave Handbook of Global Fantasy Elana Gomel, Danielle Gurevitch, 2023-06-07 This handbook is the first of its kind comprehensive overview of fantasy outside the Anglo American hegemony While most academic studies of fantasy follow the well trodden path of focusing on Tolkien Rowling and others our collection spotlights rich and unique fantasy literatures in India Australia Italy Greece Poland Russia China and many other areas of Europe Asia and the global South The first part focuses on the theoretical aspects of fantasy broadening and modifying existing definitions to accommodate the global reach of the genre The second part contains essays illuminating specific cultures countries and religious or ethnic traditions From Aboriginal myths to self representation of Tibet from the appropriation of the Polish Witcher by the American pop culture to modern Greek fantasy that does not rely on stories of Olympian deities and from Israeli vampires to Talmudic sages this collection is an indispensable reading for anyone interested in fantasy fiction and global literature

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term's speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of

recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally *Ethical Futures and Global Science Fiction* Zachary Kendal, Aisling Smith, Giulia Champion, Andrew Milner, 2020-01-27 *Ethical Futures and Global Science Fiction* explores the ethical concerns and dimensions of representations of the future of global science fiction focusing on the issues that dominate utopian dystopian and science fiction literature The essays examine recent visions of the future in science fiction and re examine earlier texts through contemporary lenses Across fourteen chapters the collection considers authors from Algeria Australia Canada China Egypt France Germany Haiti India Jamaica Macedonia Mexico Russia South Africa the UK and USA The volume delves into a range of ethical questions of immediate contemporary relevance including environmental ethics postcolonial ethics social justice animal ethics and the ethics of alterity **Sci-Fi Reader Trends** Emily James, AI, 2025-02-19 *Sci Fi Reader Trends* explores the curious paradox of science fiction a genre with often modest sales that wields significant cultural influence This book dives into how sci fi s futuristic themes vibrant fan culture and complex sales data interplay to shape our world Delving into the genre s ability to act as a speculative laboratory it examines how science fiction anticipates technological innovation and critiques social structures impacting fields far beyond literature Did you know that science fiction conventions serve as vital hubs for both creativity and community showcasing the deep engagement of its fans The book navigates the history of science fiction from utopian beginnings to cyberpunk futures while also exploring the sociological implications of its fandom It reveals that the cultural impact of science fiction outweighs its commercial success Each section of the book offers a unique perspective beginning with an introduction to core concepts and historical relevance then examining futuristic themes fan culture and sales data The analysis then culminates in offering insight into possible future directions for the constantly evolving genre **Monstrous Nature** Robin L. Murray, Joseph K. Heumann, 2016-10-01 *Godzilla* a traditional natural monster and representation of cinema s subgenre of natural attack also provides a cautionary symbol of the dangerous consequences of mistreating the natural world monstrous nature on the attack Horror films such as *Godzilla* invite an exploration of the complexities of a monstrous nature that humanity both creates and embodies Robin L. Murray and Joseph K. Heumann demonstrate how the horror film and its offshoots can often be understood in relation to a monstrous nature that has evolved either deliberately or by accident and that generates fear in humanity as both character and audience This connection between fear and the natural world opens up possibilities for ecocritical readings often missing from research on monstrous nature the environment and the horror film Organized in relation to four recurring environmental themes in films that construct nature as a monster anthropomorphism human ecology evolution and gendered landscapes the authors apply ecocritical perspectives to reveal the multiple ways nature is constructed as monstrous or in which the natural world itself constructs monsters This interdisciplinary approach to film studies fuses cultural theological and scientific critiques to explore when and why nature becomes monstrous
