Models for Planning Wildlife Conservation in Large Landscapes Joshua Millspaugh, Frank R. Thompson, 2011-04-28 A single resource volume of information on the most current and effective techniques of wildlife modeling Models for Planning Wildlife Conservation in Large Landscapes is appropriate for students and researchers alike The unique blend of conceptual methodological and application chapters discusses research applications and concepts of modeling and presents new ideas and strategies for wildlife habitat models used in conservation planning The book makes important contributions to wildlife conservation of animals in several ways 1 it highlights historical and contemporary advancements in the development of wildlife habitat models and their implementation in conservation planning 2 it provides practical advice for the ecologist conducting such studies and 3 it supplies directions for future research including new strategies for successful studies Intended to provide a recipe for successful development of wildlife habitat models and their implementation in conservation planning the book could be used in studying wildlife habitat models conservation planning and management techniques Additionally it may be a supplemental text in courses dealing with quantitative assessment of wildlife populations Additionally the length of the book would be ideal for graduate student seminar course Using wildlife habitat models in conservation planning is of considerable interest to wildlife biologists With ever tightening budgets for wildlife research and planning activities there is a growing need to use computer methods Use of simulation models represents the single best alternative However it is imperative that these techniques be described in a single source Moreover biologists should be made aware of alternative modeling techniques It is also important that practical guidance be provided to biologists along with a demonstration of utility of these procedures Currently there is little guidance in the wildlife or natural resource planning literature on how best to incorporate wildlife planning activities particularly community based approaches Now is the perfect time for a syntheistic publication that clearly outlines the concepts and available methods and illustrates them Only single

resource book of information not only on various wildlife modeling techniques but also with practical guidance on the demonstrated utility of each based on real world conditions Provides concepts methods and applications for wildlife ecologists and others within a GIS context Written by a team of subject area experts Great Habits, Great Readers Paul Bambrick-Santoyo,Aja Settles,Juliana Worrell,2013-05-29 A book that brings the habits of reading to life Great readers are not made by genetics or destiny but by the habits they build habits that are intentionally built by their teachers The early formal years of education are the key to reversing the reading gap and setting up children for success But K 4 education seems to widen the gap between stronger and weaker readers not close it Today the Common Core further increases the pressure to reach high levels of rigor What can be done This book includes the strategies systems and lessons from the top classrooms that bring the habits of reading to life creating countless quality opportunities for students to take one of the most complex skills we as people can know and to perform it fluently and easily Offers clear teaching strategies for teaching reading to all students no matter what level Includes more than 40 video examples from real classrooms Written by Paul Bambrick Santoyo bestselling author of Driven by Data and Leverage Leadership Great Habits Great Readers puts the focus on learning habits reading habits guided reading and independent reading NOTE Content video and other supplementary materials are not included as part of the e book file but are available for download after purchase **90 Days of Intention:**
