## 2025 Edition Cli Fi Novel:

*Inkbound Realms: Traversing the Landscapes of English Literature* 2025 ANINDRA KUMAR BISWAS, DR. APARAJITA SHUKLA, DR NEELAM SHUKLA, DR. REVANT GAUTAM, PREFACE Literature has always been one of humanity's most enduring ways of making sense of the world. From the rhythm of ancient oral storytelling to the fluid prose of contemporary novels, the written word carries with it the weight of history, memory, and imagination. *Inkbound Realms: Traversing the Landscapes of English Literature* was conceived as an attempt to bring these diverse voices together in one journey, illuminating the traditions, transformations, and tensions that have shaped English literature across the centuries. This book is not meant to be an encyclopaedic record nor a rigid survey of authors and dates. Instead, it aims to capture the living spirit of literature, the way it reflects the concerns of its age while also transcending them. Each chapter is crafted to situate texts within their cultural and historical contexts while offering readers concrete examples and case studies that bring the material to life. Whether one encounters Chaucer's humour, Shakespeare's depth, Dickens's social vision, or Woolf's experimental prose, the intention is to show how these works remain relevant today. The work is also guided by an inclusive spirit: English literature is no longer the sole property of Britain; it is a global phenomenon shaped by writers from Asia, Africa, the Americas, and beyond. This book embraces that plurality, tracing how English has become a shared language of storytelling, capable of expressing local identities while also speaking to universal human experiences. I hope that students will find in these chapters a helpful companion to their studies, that scholars will appreciate the synthesis of tradition and contemporary insight, and that general readers will discover or rediscover the joy of reading across ages and genres. More than anything, my aspiration is that this book encourages readers to see literature not as a closed canon but as a set of open landscapes, realms bound in ink yet constantly expanding through new voices, technologies, and cultural encounters. As you embark on this journey through the inkbound realms, may you not only gain knowledge of English literature but also a renewed sense of its beauty, power, and capacity to connect us across time and place. Authors: Anindra Kumar Biswas, Dr. Aparajita Shukla, Dr. Neelam Shukla, Dr. Revant Gautam. **The Routledge Anthology of Climate Fiction** Bill Gillard, 2024-11-26. Employing postcolonial and intersectional lenses, this volume will interrogate the historical legacies of colonialism that have intensified ecological degradation. The contributors in this volume not only observe the Anthropocene as a narrative but also assess its literary conventions to

highlight its inherently fictional framework that shape its representation in literature This volume will engage with the current developments in this field and will try to diversify various other issues      **The Best American Short Stories 2025** Celeste Ng,Nicole A. Rosenthal,Jason de Lara Molesky,2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as

much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed, with its insistent focus on redressing social disparities, cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies, literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. Cli Fi and Class focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological, addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy, and Octavia Butler to the film *Black Panther* and the Broadway musical *Hadestown*, this collection unpacks the complex ways economic exploitation impacts planetary well-being and the ways climatic change shapes those inequities in turn.

*The Ecology of American Noir* Katrina Younes, 2025-04-07. This volume investigates the relationship between the conventions of noir fiction and film and its subtypes in relation to environmental crises. Dr. Younes addresses questions that not only allow readers to re-read early hardboiled literature and neo-noir films but also help identify a new subgenre of noir and develop an ecocritical methodology, eco-noir. This text traces the development of strategies of mapping urban blight and

environmental deterioration in classic hardboiled fiction of the 1940s neo noir films of the 1970s and eco noir texts of the post millennial period Introducing the concept of eco noir as both a sub genre and fictional form as well as a methodology the volume develops a new way of understanding the relationship between noir and climate fiction texts Through a close reading of hardboiled neo noir and eco noir texts including those by Dashiell Hammett Raymond Chandler Robert Towne Kim Stanley Robinson and Jeff VanderMeer it asks and addresses the question how does each sub genre of noir map the noir atmosphere of the private investigator s natural setting in terms of environmental toxicity The Ecology of American Noir contributes to critical conversations in both noir and ecocritical scholarship making clear how a new understanding of noir as defined through environmental and atmospheric conditions invites readers viewers and scholars of the genre to generate meaningful dialogues about our decaying and deteriorating environment

**The Anthropocene Working Group and the Global Debate Around a New Geological Epoch** Martin Bohle, Boris Holzer, Leslie Sklair, Fabienne Will, 2025-03-03 This book examines the role of the Anthropocene Working Group AWG in public and scholarly discussions of the meaning of the Anthropocene proposal The status of the Anthropocene both as a geoscientific concept and as a cultural concept becoming increasingly familiar in the public sphere has been highly controversial While geoscientists focus on possible geological markers and periodisation the social sciences environmental humanities and creative arts have taken up the Anthropocene as a cultural concept to make sense of the planetary environmental crisis and contemporary society This book documents intra inter and transdisciplinary debates particularly although not limited to how different scholarly disciplines have responded to the Anthropocene proposal The authors analyse how the AWG has become the focal point of a debate that straddles the boundaries between academic disciplines and public perceptions of science The AWG thus serves as a case of the globalisation of science in terms of the global interconnectedness of scientific disciplines and the cultural significance of the Anthropocene proposal
