Space Opera Saga Framework:

The Excalibur Knights Saga Omnibus Luke Mitchell, 2022-10-21 This isn't your grandma's King Arthur story. Nate Arturi isn't a knight in shining armor. He's sure as hell isn't a king. The last time someone called him heroic it was because he fetched his neighbor's corgi off the roof. But when an ancient alien beacon awakens on Earth, sounding the call to enemies near and far, the Merlin is left with little choice. Ambushed by a hulking alien brute and tricked into accepting a foul-mouthed sword from a homeless wizard, Nate suddenly finds his senior year at Penn State more than a little out of hand. But when an armada of butt-ugly troglodans and exotic gorgon killers starts raining from the sky, one thing becomes inescapably clear: Unless he mans up and gets that damned beacon off of his planet, everything he knows is about to be burned to a crisp. And that's only the beginning of the galaxy's problems. Welcome to the Excalibur Knights Saga, a sprawling Arthurian space opera that follows the rise of Ser Nathaniel Arturi from reluctant and frankly terrible hero to the stuff of legends. If you love action-packed science fiction, snarky AI companions, and radical character growth, then secure your crash couches and prepare for 1800 pages of epic sci-fi adventure. Included in the set: The Eighth Excalibur Book 1: The Black Knight Book 2: Spoils of War Book 3: Plus the following Excalibur Knights shorts, novelette, and serial: Flight of the Huntress, The Last Good Boy, The Complete Meyerwitz Logs, The Leftovers Parts 1-4.

The strange device promises extraordinary power, but can he trust it? A small group of diverse survivors, both human and alien, are led to a backwater planet by a vague prophecy. It declares they are the only ones capable of stopping the impending apocalypse. Before they can learn more, the peaceful world is thrust into chaos. Can they hold back the menacing darkness? The Book of Minds Philip Ball, 2022-06-28 Popular science writer Philip Ball explores a range of sciences to map our answers to a huge philosophically rich question: How do we even begin to think about minds that are not human? Sciences from zoology to astrobiology, computer science to neuroscience are seeking to understand minds in their own distinct disciplinary realms. Taking a uniquely broad view of minds and where to find them, including in plants, aliens, and God, Philip Ball pulls the pieces together to explore what sorts of minds we might expect to find in the universe. In so doing, he offers for the first time a unified way of thinking about what minds are and what they can do by locating them in what he calls the space of possible minds. By identifying and mapping out properties of mind without prioritizing the human, Ball sheds new light on a host of fascinating questions: What moral rights should we afford animals and can we understand their thoughts? Should we worry that AI is going to take over society? If there are intelligent aliens out there, how could we communicate with them? Should we? Understanding the space of possible minds also reveals ways of making advances in understanding some of the most challenging questions in contemporary science: What is thought? What is consciousness? And what if anything is free will? Informed by conversations with leading researchers, Ball's brilliant survey of current views about the nature and existence of minds is more mind-expanding than we could imagine. In this fascinating panorama of other minds, we come to better know our own.

Childhood, Science Fiction, and Pedagogy David W. Kupferman, Andrew Gibbons, 2019-04-24 This book invites readers to both reassess and reconceptualize definitions of childhood and pedagogy by imagining the possibilities past, present, and future provided by the aesthetic turn to science fiction. It explores constructions of children, childhood, and pedagogy through the multiple lenses of science fiction as a method of inquiry and discusses what counts as science fiction and why science fiction counts. The book examines the notion of relationships in a variety of genres and stories, probes affect in the convergence of childhood and science fiction, and focuses on questions of pedagogy and the ways that science fiction can reflect the status quo of schooling, theory, practice, and policy, as well as offer alternative educative possibilities. Additionally, the volume explores connections between children and childhood studies, pedagogy, and posthumanism. The various contributors use science fiction as the frame of reference through which conceptual links between inquiry and narrative grounded in theories of media studies can be developed.
