Chapman, Timothy Chard, Ovrang Djahanbakhch, 2012-12-06 The examination of the human fallopian tubes was until recently restricted to observations on gross anatomical disposition and tubal patency These studies for decades were the domain of doctors and physiologists whose primary interest was population control and family planning funded largely by organisations and agencies seeking alternatives to steroidal contraceptives For a worrying but short period after the birth of Louise Brown in 1978 as the consequence of successful in vitro fertilisation and embryo transfer the fallopian tube was considered to be dispensable given that the metabolic milieu in which human fertilisation takes place could be effortlessly reproduced in a Petri dish in in vitro fertilisation procedures However a number of factors have acted together to renew interest in the fallopian tube namely new techniques in cell biology microinstrument developments in particular in imaging an interdisciplinary transfer of skills from interventional radiology and cardiology to gynaecology the surgeons wish to improve surgical techniques and better techniques to monitor early pregnancy These factors have led surgeons to develop the new diagnostic and therapeutic strategies and techniques listed here This volume contains contributions from the majority of keynote speakers at a conference held in London in April 1992 from which its title is derived Better diagnostic procedures should lead to the implementation of rational effective treatments **Frontiers in Invertebrate Physiology: A Collection of Reviews** Saber Saleuddin, Sally P. Tubes Alfred Gray, 2012-12-06 In July 1998 I received an e mail from Alfred Gray telling me I am in Bilbao and working on the second edition of *Tubes* Tentatively the new features of the book are

- 1 Footnotes containing biographical information and portraits
- 2 A new chapter on mean value theorems
- 3 A new appendix on plotting tubes

That September he spent a week in Valencia participating in a workshop on Differential Geometry and its Applications Here he gave me a copy of the last version of *Tubes* It could be considered a final version There was only one point that we thought needed to be considered again namely the possible completion of the material in Section 8.8 on comparison theorems of surfaces with the now well known results in arbitrary dimensions But only one month later the sad and shocking news arrived from Bilbao Alfred had passed away I was subsequently charged with the task of preparing the final revision of the book for the publishers although some special circumstances prevented me from finishing the task earlier The book appears essentially as Alfred Gray left it in September 1998 The only changes I carried out were the addition of Section 8.9 representing the discussion we had the inclusion of some new results on harmonic spaces the structure of Hopf hypersurfaces in complex projective spaces and the conjecture about the volume of geodesic balls
