Embodied Imaginations Chidambaram Ramesh,2023-06-05 The science behind the writers experience of characters
 developing their own will and taking objective forms Many writers have the experience that their characters have evolved
 their own personalities They start to tell their own stories and sometimes they could even rebel against the author s ideas for
 them and change the course of the whole plot That is not all though Sometimes literary characters assume objective
 appearances which are visible not just to the creators but also to others and manifesting in the real world These experiences
 raise several interesting philosophical and scientific questions Have the writers unwittingly created quasi conscious entities
 by the power of their minds Can thoughts manifest as something tangible that can be seen heard or even touched How

genuine are the contents of the mind Embodied Imaginations explores these questions highlighting the results of an investigation on this fascinating topic stemming from personal anecdotes of many writers Providing scientific evidence for the existences of these mental constructs the goal is to collect robust and reliable building blocks that may help to deconstruct perceptions and provide answers to this phenomenon The book attempts to give modern science a place where spiritual philosophical and mystical threads can be interwoven Efforts have been made to corroborate theoretical claims with experimental evidence contributing to research in cognitive psychology to determine the role of imagination in creating external reality This book will introduce you to the mysterious and profound part of creative writing that you never knew existed before

Jack the Surfer Dude the Beginning Richard Heyman,2011-12 This is the first book in a four part series about Jack a Golden Retriever pup who is raised by a family but mentored by a street smart Black Lab who teaches him about life loyalty bravery honor and to follow his dream to be a champion surfer
