Recent Trends in Fuel Cell Science and Technology S. Basu, 2007-10-20 Fuel cell science and technology is evolving fast for the past two decades as it is thought to be an efficient way of transforming chemical energy of hydrogen rich compounds to electrical energy Although this idea of direct conversion of chemical energy to electrical energy was first demonstrated by

Sir William Grove in 1839 using a fuel cell it was only in the middle of the twentieth century when Bacon's pioneering work led to the use of fuel cell in space missions The interest in commercialization of fuel cell for civilian use has caught up with government organizations and private corporations for the past decade on account of fluctuating oil prices and environmental concerns It is well known that the conventional fossil fuel which is a primary source of gasoline is not going to last more than a hundred years in the face of ever increasing demand in the developed and developing countries Although the reserves of natural gas coal and tar sands may last another two to three hundred years with the current rate of production their conversion is not efficient and pollution free Thus scientists all over the world have taken up fuel cell development work in their quest of solution to the energy crises looming largely on global population This book aims to script the present status of the rapidly developing field of fuel cell science and technology

Small Fuel Cells for Portable Applications, 11th Conference Documentation, 2009-05-07 **Mini-Micro Fuel Cells** S. Kakaç, A. Pramuanjaroenikij, L.

Vasiliev, 2008-04-10 This volume contains an archival record of the NATO Advanced Institute on Mini Micro Fuel Cells Fundamental and Applications held in Esme Izmir Turkey July 22 August 3 2007 The ASIs are intended to be a high level teaching activity in scientific and technical areas of current concern In this volume the reader may find interesting chapters on Mini Micro Fuel Cells with fundamentals and applications In recent years fuel cell development modeling and performance analysis has received much attention due to their potential for distributed power which is a critical issue for energy security and the environmental protection Small fuel cells for portable applications are important for the security The portable devices many electronic and wireless operated by fuel cells for providing all day power are very valuable for the security for defense and in the war against terrorism Many companies in NATO and non NATO countries have concentrated to promote the fuel cell industry Many universities with industrial partners committed to the idea of working together to develop fuel cells As technology advanced in the 1980s and beyond many government organizations joined in spending money on fuel cell research In recent years interest in using fuel cells to power portable electronic devices and other small equipment cell phones mobile phones lab tops they are used as micro power source in biological applications has increased partly due to the promise of fuel cells having higher energy density

PEM Fuel Cell Electrocatalysts and Catalyst Layers Jiu-Jun Zhang, 2008-08-26 Proton exchange membrane PEM fuel cells are promising clean energy converting devices with high efficiency and low to zero emissions Such power sources can be used in transportation stationary portable and micro power applications The key components of these fuel cells are catalysts and catalyst layers PEM Fuel Cell Electrocatalysts and Catalyst Layers provides a comprehensive in depth survey of the field presented by internationally renowned fuel cell scientists The opening chapters introduce the fundamentals of electrochemical theory and fuel cell catalysis Later chapters investigate the synthesis characterization and activity validation of PEM fuel cell catalysts Further chapters describe in detail the integration of the electrocatalyst catalyst layers into the fuel cell and their performance validation Researchers and

engineers in the fuel cell industry will find this book a valuable resource as will students of electrochemical engineering and catalyst synthesis
