The Readers' Advisory Guide to Genre Fiction, Third Edition Neal Wyatt, Joyce G. Saricks, 2019-07-03 Everyone's favorite guide to fiction that's thrilling, mysterious, suspenseful, thought provoking, romantic, and just plain fun is back and better than ever in this completely revamped and revised edition. A must for every reader's advisory desk, this resource is also a useful tool for collection development librarians and students in LIS programs. Inside RA experts Wyatt and Saricks cover genres such as Psychological Suspense, Horror, Science Fiction, Fantasy, Romance, Mystery, Literary, and Historical Fiction, and introduce the concepts of Adrenaline and Relationship Fiction. Includes everything advisors need to get up to speed on a genre, including its appeal, characteristics, key authors, sure bets, and trends; demonstrates how genres overlap and connect; plus suggestions for guiding readers among genres and tie genre fiction to the whole collection, including nonfiction, audiobooks, graphic novels, film, and TV, poetry, and games. Both insightful and comprehensive, this matchless guidebook will help librarians become familiar with many different fiction genres, especially those they do not regularly read, and aid library staff in connecting readers to books they're sure to love. *Sequels* Janet G. Husband, Jonathan F. Husband, 2009 A guide to series fiction lists popular series, identifies novels by character, and offers guidance on the order in which to read unnumbered series. **Bloomsbury Good Reading Guide** Nick Rennison, 2009-11-23 Deciding what to read next when you've just finished an unputdownable novel can be a daunting task. The Bloomsbury Good Reading Guide features hundreds of authors and thousands of titles with navigation features to lead you on a rich journey through some of the best literature to grace our shelves. *H2LiftShips - Beyond Luna* Bob Freeman, 2021-03-24 *H2LiftShips* a tech manual for a future. Imagine a world exactly like ours but different. You all knew we would settle on Luna and start mining the Asteroid belt. Mars, dry, dusty, with thin, unbreathable air, is just a prison planet with the added hell of lawyers and accountants in charge. Asteroid groups are unified in their desire for independence, to try different governance methods. It may not be our future, but it is a future we can get behind. Travel the solar system on solar sail ships. Meet hard working sentients: humans, canines, simians, and octopuses plying our heliosphere for fun and profit. You won't find any exploding rockets, evil aliens, laser blasters, or sparking computers. Instead, you'll find hacked comm lines, buried Luna casinos, pirates, dust balls, and weaponized beef jerky. And after your cruise through the Asteroid belt, Mars, and Luna, settle down on Earth for a party in the desert; they'll bring the Carne Asada burritos, you bring the fun. No matter what regime is in charge, Gig workers have to jump from job to job, trying to earn enough for food, shelter, air, and waste disposal. Welcome! Join humans, simians, canines, and octopuses in our new future, gigging and living in the void. *New Approaches to Transcodification* Massimo Fusillo, Dorian Legge, Mirko Lino, Mattia Petricola, Gianluigi Rossini, 2025-08-04 This collection aims to renew our perspective on adaptation and intermedial processes by thinking of them in terms of codes rather than media. As a result, the notion of transcodification emerges as a crucial tool in order to study the circulation of semiotic and aesthetic resources across disciplines, knowledge systems, and cultures. Defined as the

transfer of meaning making potential from one semiotic domain to another transcodification both includes and transcends intermediality thus dramatically expanding the scope and research potential of adaptation and intermedial studies The essays collected here apply this framework to an incredibly wide variety of objects and issues from the relationship between art and historiography to the visual culture of finance from contemporary approaches to ekphrasis to the hidden labor of screenwriters from modern surveillance to digital comics from fansubbing to the reception of the classical world in the digital age from medieval theater to the role of videogames in the war on terror By fostering dialogue between radically different disciplines the book offers a unique approach to the study of semiotic interrelations across the most diverse aspects of human culture
