DIGITALIZATION, METAVERSE, ARTIFICIAL INTELLIGENCE IN THE CONTEXT OF HUMAN AND INDIVIDUAL RIGHTS PROTECTION IN UKRAINE AND THE WORLD Kostenko Oleksii, Kharytonova Olena, Kharytonov Yevhen, 2025-06-23 This monograph examines the legal issues related to the dynamics of Ukraine's digital transformation focusing on the intersection of artificial intelligence, the metaverse, and the protection of human rights in general and individual rights in particular in Ukraine and the world. The monograph offers a comprehensive legal analysis of the categories and phenomena of global digitalization such as the metaverse, the artificial Internet, digital rights, digital identity, etc. The key topics include understanding artificial intelligence as a legal concept, studying the problems of its legal personality and responsibility, and establishing its significance and role in the context of hybrid warfare. In addition, the study analyzes the potential of artificial intelligence technologies in the economic and industrial revival of Ukraine, the possibilities and legal problems of their use in legal, including notary practice, in the field of medicine and pharmacy, in education, and in the corporate sector. It also explores the current problems of using blockchain technology and artificial intelligence in the management of intellectual property rights. This emphasizes the need for interdisciplinary cooperation to address the challenges of protecting sensitive data and innovation while promoting a sustainable balance between innovation and social well-being. This work contributes to the ongoing discourse on the role of digital technologies in shaping future societies by offering a unique perspective on their application and governance on Ukraine's path to a digital society.
