

How do the perspectives of UK university students, as expressed on Reddit, evolve over time?

Examining key themes and sentiment trends from r/UKUni posts (2014-2023) to understand the changing perspectives and emotional dynamics of UK university students.

BACKGROUND	TOPIC ANALYSIS	SENTIMENT ANALYSIS	TOPIC DATA	INTERPRETATION
------------	----------------	--------------------	------------	----------------

Interpretation, Limitations and Future Direction

The topic frequency graph provides an overview of the most prevalent themes discussed by UK university students on Reddit over time. Notably, while the chart shows an increasing trend for all topics as the subreddit grows, it particularly highlights 'Topic 4: Mental Health' as a dominant concern. Examining the data allows us to identify the relative prevalence of each topic over time. Among the top topics, we find a mix of academic concerns (e.g., accommodation, university applications), social aspects (e.g., finding friends, loneliness), and personal well-being (e.g., mental health, finance). First, the prevalence of topics such as job, university choice and applications, accommodation and finance highlight the practical challenges that students face in their university journey. Secondly, students use such social media platforms as an avenue of seeking help and advice from other UK university students who have experienced similar concerns. These discussions not only provide valuable peer-to-peer support but also offer insights into the common struggles and decision-making processes of students.

However, it is important to acknowledge the limitations of this study. First, it only captures the public discourse on Reddit and may not reflect the full range of student experiences. Second, the data is retrospective and may not capture the most recent trends. Finally, the analysis is based on self-reported data, which may be subject to bias. Future research could explore these limitations and build on the findings of this study.
