Snow, Vibeke Grøver, Catherine McBride, 2017-03-31 The Routledge

International Handbook of Early Literacy Education offers a pioneering overview of early literacy provision in different parts of the world and brings together interdisciplinary research evidence on effective literacy teaching to inform current and future practice and policy of early literacy. From the problem of identification of literacy difficulties in a particular learning context to supporting the provision of early literacy through digital media, the handbook deals with the major concerns and newest areas of interest in literacy research. With an international and future vision, it provides an accessible guide to the main debates and future trends in the global field of early literacy and informs academics, policy makers, practitioners, educators, and students about innovative early literacy research methods and instruction. The three sections and 30 groundbreaking chapters reflect a conceptual framework of questions asked by scholars and educators interested in looking beyond traditional definitions of literacy. Part I provides contemporary insights collected by internationally renowned scholars on what literacy is and what it can offer to young children in the twenty-first century. Part II is a collection of detailed portraits of 14 countries, regions, or language communities and focuses on early literacy provision, practice, and policy from across the world. Part III outlines key interventions and research-endorsed practices designed to support home-school connections and children's reading and writing skills, as well as vocabulary, phonological awareness, and narrative abilities, with examples drawn from various home-school and community environments. All chapters promote discussion, critical analysis, and questions for reflection and are written in jargon-free language in an easy-to-use, themed format. This handbook is an indispensable reference guide for practising teachers and student teachers, especially those undertaking postgraduate qualifications, as well as early literacy researchers, policy makers, and school-based literacy leaders. **The Learning and Teaching of Phonological Decoding in Chinese EFL Children** Keren Hua, 2024-08-30. This book presents the learning and teaching of phonological decoding in Chinese EFL primary classrooms. The phonological decoding ability of the children is described, interpreted, and evaluated; the teaching materials are analyzed, and the classroom instruction observed, and the links between these various facets are explored using both quantitative and qualitative techniques: textbook analysis, classroom observations, interviews with teachers, and a textbook writer, reading test, and nonword reading test. This book provides insights into Chinese children's phonological decoding profile, including performance in decoding different types of orthographic units, the strategies children at different levels of reading ability use to sound out vowel graphemes, and their decoding ability in relation to reading ability. The investigation of the teaching practices reveals how the decoding instruction is designed, developed, and delivered to the children and thereby informs the interplay between the classroom instruction and children's development of phonological decoding skills.
