Cognitive Behavioral Stress Management (CBSM) and relaxation training constitute the two components of this comprehensive program. Each session provides participants with stress management skills including cognitive restructuring, coping strategies, and social support. Participants practice a variety of relaxation methods such as progressive muscle relaxation, imagery, and meditation. Relevant issues for men having had prostate cancer such as sexuality and communication are also addressed. This guide is designed to be used in conjunction with the corresponding workbook which includes in-session exercises, monitoring forms, and homework assignments.
