Tweets and the Streets Paolo Gerbaudo, 2012-10-05 What should we make of the culture of the protest movements of the 21st century From the Arab Spring to the indignados protests in Spain and the Occupy movement Paolo Gerbaudo examines the relationship between the rise of social media and the emergence of new forms of protest Gerbaudo argues that activists use of Twitter and Facebook does not fit with the image of a cyberspace detached from physical reality Instead social media is used as part of a project of re appropriation of public space which involves the assembling of different groups around occupied places such as Cairo s Tahrir Square or New York s Zuccotti Park An exciting and invigorating journey through the new politics of dissent *Tweets and the Streets* points both to the creative possibilities and to the risks of political evanescence which new media brings to the contemporary protest experience

*Media Ownership and Agenda Control* Justin Schlosberg, 2016-11-10 *Media Ownership and Agenda Control* offers a detailed examination of media ownership amidst the complexities of the information age from the resurgence of press barons to the new influence wielded by internet giants Much of the discussion pivots around recent revelations and controversies in the media industry such as the findings published in 2012 from the Leveson Inquiry the US Federal Communications Commission s ruling on net neutrality in 2015 Edward Snowden s decision to leak National Security Agency NSA documents in 2013 and the legal battles over ancillary copyrights waged in Germany and elsewhere Justin Schlosberg traces the obscure and often unnoticed ways in which agendas continue to be shaped by a small number of individual and institutional megaphones despite the rise of grassroots and participatory platforms and despite ubiquitous displays of adversarial journalism Above all it explores the web

of connections and interdependence that binds old and new media gatekeepers and cements them to the surveillance and warfare state This ultimately foregrounds the book's call for a radical rethink of ownership regulation situating the movement for progressive media reform alongside wider struggles against the iniquities and injustices of global capitalism This book's re-evaluation of the nature of media ownership and control in a postdigital world will prove to be an invaluable resource for students of media studies and journalism as well as all those with an interest in the changing dynamics of media power Get involved [Reclaimthemedi.org](http://Reclaimthemedi.org)

**Artificial Intelligence in Healthcare and COVID-19** Parag Chatterjee, Massimo Esposito, 2023-05-21 Artificial Intelligence in Healthcare and COVID 19 showcases theoretical concepts and implementational and research perspectives surrounding AI. The book addresses both medical and technological visions making it even more applied. With the advent of COVID 19 it is obvious that leading universities and medical schools must include these topics and case studies in their usual courses of health informatics to keep up with the pace of technological and medical advancements. This book will also serve professors teaching courses and industry practitioners and professionals working in the R D team of leading medical and informatics companies who want to embrace AI and eHealth to fight COVID 19. Since AI in healthcare is a comparatively new field there exists a vacuum of literature in this field especially when applied to COVID 19. With the area of AI in COVID 19 being quite young students and researchers usually face a struggle to rely on the few published papers which are obviously too specific or whitepapers by tech giants which are too wide. Discusses the fundamentals and theoretical concepts of applying AI in healthcare pertaining to COVID 19. Provides a landscape view to the applied aspect of AI in healthcare related COVID 19 through case studies and innovative applications. Discusses key concerns and challenges in the field of AI in eHealth during the pandemic along with other allied fields like IoT creating a broad platform of transdisciplinary discussion.
