AI IN EVERYDAY LIFE: TRANSFORMING SOCIETY Dr. Abhinandan Singh Dandotiya, Dr. Shashi Kant Gupta, Dr. Nidhi Dandotiya, Mr. Palash Sharma, 2024-09-18 Artificial Intelligence AI has rapidly woven itself into the fabric of everyday life transforming how society operates in profound ways Its integration into various aspects of daily routines has led to increased efficiency and convenience from personalized recommendations on streaming platforms to automated customer service AI's ability to analyze vast amounts of data and learn from it has enabled more intelligent decision-making processes enhancing productivity across industries This technological advancement has also facilitated the development of smart homes and cities where AI-driven systems manage everything from energy consumption to traffic flow creating environments that are more responsive to human needs Beyond convenience AI is reshaping the workforce and education requiring societies to adapt to new modes of work and learning Automation is taking over repetitive tasks freeing up human workers to focus on more complex and creative endeavors However this shift also raises concerns about job displacement and the need for reskilling In education AI-driven personalized learning systems are providing tailored educational experiences helping to bridge gaps in

knowledge and cater to individual learning styles These changes are prompting a reevaluation of traditional educational models and career paths highlighting the need for continuous learning and adaptability On a broader scale AI is playing a critical role in addressing global challenges such as climate change healthcare and resource management In healthcare AI powered diagnostic tools are improving the accuracy and speed of disease detection leading to better patient outcomes In environmental management AI is being used to monitor and predict environmental changes aiding in the development of sustainable practices As AI continues to evolve its impact on society will only deepen presenting both opportunities and challenges that require careful consideration and responsible governance to ensure that its benefits are equitably distributed

Artificial Intelligence and the City Federico Cugurullo, Federico Caprotti, Matthew Cook, Andrew Karvonen, Pauline McGuirk, Simon Marvin, 2023-12-01 This book explores in theory and practice how artificial intelligence AI intersects with and alters the city Drawing upon a range of urban disciplines and case studies the chapters reveal the multitude of repercussions that AI is having on urban society urban infrastructure urban governance urban planning and urban sustainability Contributors also examine how the city far from being a passive recipient of new technologies is influencing and reframing AI through subtle processes of co constitution The book advances three main contributions and arguments First it provides empirical evidence of the emergence of a post smart trajectory for cities in which new material and decision making capabilities are being assembled through multiple AIs Second it stresses the importance of understanding the mutually constitutive relations between the new experiences enabled by AI technology and the urban context Third it engages with the concepts required to clarify the opaque relations that exist between AI and the city as well as how to make sense of these relations from a theoretical perspective Artificial Intelligence and the City offers a state of the art analysis and review of AI urbanism from its roots to its global emergence It cuts across several disciplines and will be a useful resource for undergraduates and postgraduates in the fields of urban studies urban planning geography architecture urban design science and technology studies sociology and politics

Intelligent Systems Modeling and Simulation III Samsul Ariffin Abdul Karim, 2024-09-21 This book continues the previous edition Samsul Ariffin Abdul Karim 2022 **Intelligent Systems Modeling and Simulation II** Machine Learning Neural Networks Efficient Numerical Algorithm and Statistical Methods Studies in Systems Decision and Control SSDC volume 444 22k Access After two years **Intelligent Systems Modeling and Simulation** have evolved tremendously through the latest and advanced emergence technologies and many highly sophisticated algorithms have been developed by blending artificial intelligence AI and mathematics statistics data modelling and other related research areas These blends offer many opportunities and further investigations into the overlap and equality between these areas It is a well known fact that most industries and companies have utilized this IR4 0 architecture in various levels of manufacturing and decision processes Besides nowadays IR5 0 or Society5 0 has also been embedded into various systems in industries as well as in Teaching and Learning TL The combination of IR4 0 and Society 5 0 may result in

more impactful outcomes especially in automated decision making and reliable simulations based modelling Furthermore IR4 0 and Society5 0 through Data Driven have made a significant contribution to the government and companies to analyse big data via predictive analytics Cyber security firewalls on all systems must be up to date to prevent any malicious attacks by hackers Otherwise our citizens might be scammed and according to NBC News the total loss for 2022 is around USD 8 8 billion These are very huge amount Just recently COVID 19 has been spreading all over the world again To assist the Ministry of Health MOH and other government agencies it is very crucial to identify predict detect and quarantine the COVID 19 on the susceptible persons soonest possible Intelligent Image Processing techniques are very demanding here This is to ensure that we can control and minimise the spread Inspire by these latest developments in this book various experts in the areas of Artificial Intelligence Machine Learning Deep Learning Neural Networks Modeling and Simulation Cyber Security and Awareness Intelligent Statistical Methods Big Data Analytics Sentiment Analytics Intelligent Function Approximation Image Processing in medical imaging especially on COVID 19 AI in Teaching and Learning and Computational Intelligence will share their latest studies and experiences Their finding is in line with United Nations Sustainable Development Goals SDGs such as No 9 Industry Innovation and Infrastructure particularly Target 9 4 9 5 9 a 9 b and 9 c No 11 Sustainable Cities and Communities particularly Target 11 b and Indicators 11 b 1 and 11 b 2 and SDG No 4 Quality Education particularly Target 4 7 and Indicator 4 7 1 This book is highly suitable for postgraduate students and researchers to get the state of the art current research directions as well as for the scientists that have an interest and working in intelligent numerical modelling and simulations through AI Machine Learning Neural Networks and its related counterparts Towards HRI of Everyday Life Karolina Zawieska, Mohammad Obaid , Wafa Johal, Jessica Sorenson, Catharina Vesterager Smedegaard, Glenda Hannibal, 2025-10-03 Presently it is often assumed that at least in principle robots and social robots in particular have the potential to increase human well being across a wide range of sectors and application areas At the same time efforts to introduce such systems into our everyday environments have had only limited success and it is yet to be seen whether the impact of social robots on our daily lives professional and private will actually be beneficial Therefore there is a need to systematically address and study the long term use and presence of social robots in everyday environments where humans not only interact with robots but also have them integrated into the totality of their lived experiences in everyday life One of the main ways to investigate human engagement with social robots in everyday environments is through HRI studies conducted in the wild While such an approach has certainly been instrumental to and is increasingly used in HRI research we propose here to further expand the underlying theoretical and methodological frameworks to address the notion of everyday life The latter is viewed here as a useful concept and an umbrella term that allows us to address not only specific application domains for robots but also the continuity and totality of human lived experiences that emerge through long term engagement with social robots in everyday life contexts Placing social robots in everyday settings has often been an explicit

goal for robot development however the notion of everyday life has yet to be systematically analysed and addressed in this context Therefore this Research Topic aims to bring together a wide range of disciplinary and interdisciplinary contributions to further develop the HRI domain
