Landscape Ecology in the Dutch Context T.M. de Jong, J.N.M. Dekker, R. Posthoorn, 2017-04-03 This book is the result of three symposia of the Dutch Society for Landscape Ecology Werkgemeenschap voor Landschapsecologisch Onderzoek about the Dutch National Ecological Network urban ecology and civil infrastructure The three topics among others show important contexts in which landscape ecologists do their research and apply their knowledge and skills The book focuses on urbanisation intensive land use and water management as characteristic features of the Netherlands and therefore presents an important view on landscape ecology in the Dutch context *The selfmade land* Gerhard Dekker, Len de Klerk, Peter Paul Witsen, Hans van der Cammen, 2012-09-26 Nederland is n van de meest dichtbevolkte landen ter wereld Dan moet je verstandig omgaan met de beschikbare ruimte Waar gaan we werken waar wonen en waar vakantie houden Wat bebouwen en wat blijft ongerept Nergens ter wereld wordt daar zo grondig over nagedacht als in Nederland Internationaal geldt Nederland als gidsland op het gebied van de ruimtelijke ordening Vanwege deze positie en om aan de vraag vanuit het Engelstalige onderwijs te voorzien verschijnt nu deze geheel herziene Engelstalige editie van het standaardwerk Ruimtelijke ordening *Rule and Order Dutch Planning Doctrine in the Twentieth Century* A. Faludi, A.J. van der Valk, 2013-04-17 This book is about an art in which the Netherlands excels strategic planning Foreign observers will need little convincing of the merits of Dutch planning They will want to know whether routine explanations small country industrious disciplined people hardened by the perennial fight against the sea hold any water and they will want to know where to look for the bag of tricks of Dutch planners Dutch readers need to be convinced first that planning in the Netherlands is indeed effective before contemplating how this has come about Our message for both is that to the extent that Dutch planners do live in what others are inclined to see as a planners paradise it is a paradise carefully constructed and maintained by the planners themselves This smacks of Bernard Shaw describing a profession as a conspiracy against laity However all knowledge and all technologies are socially constructed meaning that they are the products of people or groups pursuing often conflicting aims and coming to arrangements about what is to pass as true and good So this takes away the odium of Dutch planners having their own agenda Positioning ourselves We are in the business of interpreting Dutch planning and at the same time committed to improving it This makes us part of the situation which we describe This situation is characterized by the existence of two divergent traditions urban design and the social science discipline called planologie **20th Century Urban Design in the Netherlands** Hans Ibelings, 1999 Edited by Hans Ibelings Geschiedenis van Holland Thimo de Nijs, Eelco Beukers, 2002 **Bibliografie van de stedengeschiedenis van Nederland** G. van Herwijnen, 2023-08-28 Texts

and chronologies illustrating the constitutional and administrative history of European towns through the middle of the thirteenth century **Population Forecasting 1895-1945** H.A. de Gans, 2012-12-06 Authors scholars and scientists whose mother tongue is not one of the major languages of international communication are seriously disadvantaged Some individuals such as Joseph Conrad or Vladimir Nabokov have overcome that handicap brilliantly Others learn to live with it they can express themselves sufficiently lucidly in a second language to make their voice heard internationally At least when they have something original or striking to say they will be certain to reach their peers Most scientists and scholars fall into that category Others again have to wait until their work has been translated before its value is recognised This may apply even to those whose mother tongue is widely read The writings of Frenchmen Lyotard Derrida Baudrillard or Foucault on post modernism on language discourse and power for example had tremendous world wide impact only after English translations appeared on the market De Gans study of the development of population forecasting in The Netherlands is another striking illustration of the effects a language barrier may have He demonstrates convincingly that although a possibly somewhat awkward Dutchman named Wiebols was a pioneer of modern cohort component demographic forecasting he never received international recognition for this In his thesis of 1925 Wiebols employed the newest instruments of demographic analysis in improving forecasting methodology Oude fabrieksgebouwen in Nederland P.
