Integrated View from Research and Practice Terezinha Nunes, 2012-12-06 Literacy research has continued to develop at
a rapid pace in these last five years of the millennium New ideas about how children learn to read have led to a better
understanding of the causes of progress and failure in the mastery of literacy with repercussions for children s assessment
and teacher education These new discoveries also allow teachers to transcend the old debates in reading instruction phonics
versus whole language and offer the path to a synthesis At the same time research with teachers about their own
implementation of methods and the development of their own knowledge about the teaching of literacy has produced a fresh
analysis of the practice of literacy teaching Inspired by these developments teachers teacher educators and researchers
worked together to produce this volume which promotes the integration of literacy research and practice
