German Military Vehicles of World War II Jean-Denis G.G. Lepage, 2014-11-18 This volume presents a cross section of the most common transport vehicles produced and used by the German army. Tanks plus auxiliary vehicles such as cars motorcycles vans ambulances trucks and tractors made it possible for the troops to keep moving. These lightly armored or unarmored vehicles aka soft skins operated behind the front lines maintaining supply lines connecting armies with their home bases and ultimately determining the outcome of battle. Beginning with the development of military vehicles in the early 1930s this volume discusses the ways in which this new technology influenced and to some extent facilitated Hitler's program of rearmament. Nomenclature standard equipment camouflage and the combat roles of the various vehicles are thoroughly examined. Individual vehicle types are arranged and discussed by the following classifications: cars and motorcycles trucks and tractors half tracks and wheeled combat vehicles. Accompanied by well researched detailed line drawings each section deals with a number of individual vehicles describing their design manufacture and specific use.
