Cli Fi Novel Hardcover:

The Noah Myth in Twenty-first-century Cli-fi Novels Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene. With the rise of concern about global warming in recent years, climate change fiction or cli fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research. Flood narratives have become a subsection of cli fi in their own right. This book proposes new readings of four recent rewritings of the Noah myth: *Odds Against Tomorrow* by Nathaniel Rich, Margaret Atwood's *Maddaddam* trilogy, *When the Floods Came* by Clare Morrall, and *The Flood* by Maggie Gee. Helen E. Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years, acknowledging important contributions from critics including Adam Trexler, Adeline Johns Putra, and Astrid Bracke. However, her book's strength is that it takes a new approach, going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. While the importance of climate change is beyond debate, this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene. y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. Science Fiction and Climate Change Andrew Milner, J. R. Burgmann, 2020 This is a timely comprehensive and thoroughly researched study of climate fiction from around the world, including novels, short stories, films, and other formats. Informed by a sociological perspective, it will be an invaluable resource for students and scholars looking to enter and expand the field of climate fiction studies.

Green Matters, 2019-11-26 *Green Matters* offers a fascinating insight into the regenerative function of literature with regard to environmental concerns. Based on recent developments in ecocriticism, the book demonstrates how the aesthetic dimension of literary texts makes them a vital force in the struggle for sustainable futures. Applying this understanding to individual works from a number of different thematic fields, cultural contexts, and literary genres, *Green Matters* presents novel approaches to the manifold ways in which literature can make a difference. While the first sections of the book highlight the transnational focus on Canada, the last section allows a more specific exploration of how themes, genres, and literary forms develop their own manifestations within a national context. Through its unifying ecocultural focus and its variegated approaches, the
